

**AGENDA  
PLANNING ADVISORY BOARD  
REGULAR MEETING  
JANUARY 12, 2022  
5:00 PM  
CITY HALL COMMISSION CHAMBERS  
204 ASH STREET  
FERNANDINA BEACH, FL 32034**

- 1. CALL TO ORDER / ROLL CALL / DETERMINATION OF QUORUM**
- 2. PLEDGE OF ALLEGIANCE**
- 3. APPROVAL OF MEETING MINUTES**

3.1 APPROVAL OF MINUTES FROM THE DECEMBER 8, 2021 REGULAR MEETING.

**4. OLD BUSINESS**

- 4.1 **VISION 2045 STATEMENT:** Review current draft Vision Statement, Collect Public Comment, and Obtain Board Direction on the Statement only.

Current DRAFT Vision Statement:

*"Fernandina Beach is a historic waterfront island community where its environment and economy are in balance to support longstanding community values as reflected through sustainable and resilient development, embracing technological advances in public infrastructure, promoting transportation options, providing enhanced civic facilities for all ages and abilities, and cherishing its diversity and equality to further a healthy and well preserved City for future generations."*

Staff will provide a presentation of the Vision 2045 Plan to serve as an introduction to the board and public. Following the presentation, the board will consider public comment and provide direction to staff for formal board approval at a special meeting on Wednesday, January 26, 2022 at 5pm. It is anticipated that the City Commission will take action on the Board's recommended vision statement at a regular meeting in February.

- 5. BOARD BUSINESS**
- 6. STAFF REPORT**
  - 6.1 2022 PLANNING PROJECTS AND STAFFING UPDATE**
- 7. PUBLIC COMMENT**
- 8. ADJOURNMENT**

---

**NEXT PAB REGULAR MEETING IS SCHEDULED FOR WEDNESDAY, FEBRUARY 9, 2022.**

All members of the public are invited to be present and be heard. Persons with disabilities requiring accommodations in order to participate in this program or activity should contact the City Clerk at (904) 310-3115 or TTY/TDD 711 (for the hearing or speech impaired). All interested parties may appear at said meeting and be heard as to the advisability of any action, which may be considered with respect to such matter. For information regarding this matter, please contact the Planning Department (904) 310-3135.

**MINUTES  
PLANNING ADVISORY BOARD  
REGULAR MEETING  
DECEMBER 8, 2021**

**1. CALL TO ORDER 5:00**

**2. ROLL CALL / DETERMINATION OF QUORUM**

**MEMBERS PRESENT:**

|                        |                 |
|------------------------|-----------------|
| Genece Minshew (Chair) | Mark Bennett    |
| Victoria Robas         | Peter Stevenson |
| Barbara Gingher        | John Boylan     |

**MEMBERS ABSENT:**

Brandy Carvalho

**OTHERS PRESENT:**

Kelly Gibson, Planning & Conservation Director  
Jacob Platt, Senior Planner  
Sal Cumella, Preservation Planner  
Tammi Bach, City Attorney  
Taylor Hartmann, Recording Secretary  
Andrew Crozier, WGI (Virtual)

**3. PLEDGE OF ALLEGIANCE**

**Chair Minshew reviewed a few housekeeping guidelines and congratulated Member Robas and Member Gingher on their reappointments to the PAB.**

**4. APPROVAL OF MEETING MINUTES**

4.1 Approval of Minutes for the PAB Regular Meeting of November 10, 2021.

**ACTION TAKEN: A motion was made by Member Stevenson, seconded by Member Robas to approve the minutes as presented.**

**Vote upon passage of the motion was taken by ayes and nays and being all ayes, carried.**

**5. OLD BUSINESS**

**5.1 Vision 2045 Plan Presentation by WGI with Board and Public Discussion**

*(All draft documents will be uploaded to the Vision 2045 website by December 8, 2021.)*

**Official kick-off of the 4-week public comment period from December 8, 2021 - January 5, 2022**

Ms. Gibson provided the Board with a brief overview of the history of the Vision 2045 Plan and introduced WGI Consultant, Andrew Crozier.

Mr. Crozier presented a PowerPoint slideshow of the Vision 2045 Plan format and content. This included a timeline of what activities have taken place since the start of this process in May 2021, a mission statement of the Vision, main themes, implementation methods, and appendices for additional supporting documentation.

Ms. Gibson stated that PDF and text forms of this presentation, as well as a comment box, are available on the City's website.

Chair Minshew opened the public comment forum.

Eric Schmidt, virtually present, spoke of the opportunity to meet with the consultants and felt that it was a very productive way to provide input.

With no other parties wishing to speak, Chair Minshew closed the public comment forum.

Commissioner Kreger stated that he had anticipated seeing more individuals and inquired whether there would be an additional opportunity for public outreach.

Members commended staff and WGI on the incredible amount of time and effort that has been put into the Vision Plan.

Julie Ferreira, 501 Date Street, inquired about seeing more of the document and possibly pushing back the public comment and/or workshop until after the Holidays.

Betsey Huben, inquired about possibly distributing copies of the document to locations such as the Chamber of Commerce and public library.

Richard Timm, present by phone call, 2126 Shell Cove Circle, offered the suggestion of providing a brief video that summarizes the document.

Members all agreed that more face-to-face time with the public is necessary.

## **6. NEW BUSINESS**

- 6.1 PAB 2021-0009 - Final Plat: Crane Island - Phase 2E, Scott Borowski, Clary & Associates, Agent for The Range at Crane Island, LLC.

Member Robas inquired about the total number of platted lots on Crane Island.

Mr. Platt confirmed that the Crane Island subdivision will only have 113 platted parcels versus the original proposed 169 platted parcels.

Julie Ferreira, 501 Date Street, inquired about whether the property owners are considering the large mature tree canopy and its protection during construction.

Mr. Platt explained that Staff works with the contractors and homeowners regularly to ensure maximum tree preservation.

Ted Griffin, 2427 High Rigger Road, inquired whether there will always be public access. Mr. Platt confirmed in the affirmative that there will always be a 5-acre public park available to all.

**ACTION TAKEN: A motion was made by Member Robas, seconded by Member Stevenson to recommend approval of PAB case 2021-0009 to the City Commission; AND that PAB case 2021-0009 as presented is sufficiently compliant with the Comprehensive Plan and Land Development Code and applicable Florida**

**Statutes to be approved at this time.**

**Vote upon passage of the motion was taken by voice vote, and being all ayes, carried.**

- 6.2 PAB 2021-0010 - Final Plat: Crane Island - Phase 2C, Scott Borowski, Clary & Associates, Agent for The Range at Crane Island, LLC.

**ACTION TAKEN: A motion was made by Member Robas, seconded by Member Stevenson to recommend approval of PAB case 2021-0010 to the City Commission; AND that PAB case 2021-0010 as presented is sufficiently compliant with the Comprehensive Plan and Land Development Code and applicable Florida Statutes to be approved at this time.**

**Vote upon passage of the motion was taken by voice vote, and being all ayes, carried.**

**6.3 CITY OF FERNANDINA BEACH, AGENT FOR IP HOLDINGS GROUP, LLC, NASSAU TRUST LLC, AND MACEDONIA AME CHURCH.**

Expansion of Local Downtown Historic District Boundary to include:

BLOCK 2, LOTS 29-33 & BLOCK 46, LOTS 5 & PT OF LOT 6 IN OR 1892/1458 BEING PARCELS "1", "3" & "5" & BLOCK 49 PT OF LOTS 4 & 5 IN OR 1892/1458 BEING PARCELS "2" & "4".

*Willing property owners have requested to be included in the City's locally adopted downtown historic district boundary. LDC Section 8.03.02 (M) requires that the Planning Advisory Board make recommendations for the consideration of the Historic District Expansion before proceeding to the City Commission for final decision making through an ordinance. After following all applicable review and notice criteria provided in LDC Section 8.03.02, the Historic District Council (reference HDC 2021-0033) completed its review and issued a recommendation of approval at its regular meeting on October 21, 2021. Staff continues to support the district's expansion.*

Sal Cumella, City of Fernandina Beach Preservation Planner, provided the Board with a slideshow presentation of all properties requesting the historic district designation along with criteria met by each property in order to qualify as a contributing historic structure.

Public comment was opened

Mike Kegler, 325 Street, provided a brief explanation of the corner stone that was recently unearthed at the Macedonia church .

**ACTION TAKEN: A motion was made by Member Robas, seconded by Member Stevenson to recommend approval of the Expansion of Local Downtown Historic District Boundary to include:**

**BLOCK 2, LOTS 29-33 & BLOCK 46, LOTS 5 & PT OF LOT 6 IN OR 1892/1458 BEING PARCELS "1", "3" & "5" & BLOCK 49 PT OF LOTS 4 & 5 IN OR 1892/1458 BEING PARCELS "2" & "4" to the City Commission; AND that this recommendation as presented is sufficiently compliant with the Comprehensive Plan and Land Development Code and applicable Florida Statutes to be approved at this time.**

**Vote upon passage of the motion was taken by voice vote, and being all ayes, carried.**

**6.4 LAND DEVELOPMENT CODE TEXT AMENDMENTS (PAB CASES 2021-12, 2021-13, 2021-14, 2021-15, 2021-16)**

*The following Land Development Code Text Amendments have been reviewed and discussed over the past several months in noticed public meetings by the Planning Advisory Board. The hearing to be conducted on this agenda is for final recommendations by the PAB before moving the items to the City Commission for decision making through several ordinances. The City Commission will consider items at two public hearings anticipated for January 18, 2022 and February 15, 2022. Draft and final minutes of all prior public meetings conducted in these cases may be obtained by contacting the Department of*

*Planning and Conservation.*

*Prior meeting dates include: 9/8/21, 9/22/21, 10/13/21, 10/27/21, and 11/10/21.*

- 641 **CITY OF FERNANDINA BEACH, LAND DEVELOPMENT CODE TEXT AMENDMENTS (PAB 2021-12):** MINOR AMENDMENTS TO ADDRESS ERRORS, OMISSIONS AND CORRECTIONS INCLUDING SECTION 1.03.05 CONSTRUCTION OR DEMOLITION OF STRUCTURES ON COMBINED LOTS TO ADDRESS PROCEDURAL REQUIREMENTS FOR SEEKING A VARIANCE; AND AMENDING SECTION 1.07.00 DEFINITION OF VARIANCE; AND SECTION 2.03.02 ADDING CEMETERIES AS PERMISSIBLE WITHIN REC ZONING DISTRICT, ADDING HEALTH CLUBS AND GYMS AS PERMISSIBLE IN C-1 ZONING DISTRICT, ADDING MUSIC, DANCING, PHOTOGRAPHY, OR ART STUDIOS AS PERMISSIBLE IN C-1 ZONING DISTRICT; AND SECTION 4.05.12 TO INCLUDE REFERENCE FOR PORT BUFFER REQUIREMENTS CONSISTENT WITH THE COMPREHENSIVE PLAN; AND SECTION 5.01.03 CLARIFYING ACCESSORY STRUCTURE SETBACKS TO INCLUDE FRONT YARD SETBACK MEASUREMENT; AND SECTION 5.01.05 TO CLARIFY THE MEASUREMENT OF FENCES AND WALLS; AND SECTION 5.01.06 ALLOWING FOR VINYL DUMPSTER ENCLOSURES AND ADDING AN EXEMPTION FOR INDUSTRIAL USES ON I-2 ZONED PROPERTIES; AND SECTION 6.02.04 CLARIFYING SUPPLEMENTAL STANDARDS FOR MOTORIZED VEHICLE SALES WITHIN THE MU-8 ZONING DISTRICT; AND SECTION 8.01.02(D) TO REFERENCE PREVIOUSLY CORRECTED PARKING STANDARDS WITHIN THE COMMUNITY REDEVELOPMENT AREA (CRA); and SECTION 7.01.04(a) FOOTNOTE 2 TO REFERENCE TO CRA PARKING STANDARDS; AND AMENDING SECTION 11.02.01 TO PROVIDE ADDITIONAL NOTICE REQUIREMENTS FOR CERTAIN APPLICATIONS; AND AMENDING 11.02.03 EXPANDING MAILED NOTICE REQUIREMENTS TO 500 FEET; AND AMENDING 11.07.01 CLARIFYING APPEALS OF ADMINISTRATIVE DECISIONS

Members reviewed previously held discussions at PAB regular meetings and workshops and agreed on the proposed amendments.

**ACTION TAKEN: A motion was made by Member Robas, seconded by Member Stevenson to recommend approval of PAB case 2021-0012 to the City Commission; AND that PAB case 2021-0012 as presented is sufficiently compliant with the Comprehensive Plan and Land Development Code and applicable Florida Statutes to be approved at this time.**

**Vote upon passage of the motion was taken by voice vote, and being all ayes, carried.**

- 642 **CITY OF FERNANDINA BEACH, LAND DEVELOPMENT CODE TEXT AMENDMENTS (PAB 2021-13):** CITY COMMISSION DIRECTED TREE ORDINANCE UPDATES INCLUDING AMENDING SECTION 4.05.03 LANDSCAPE REQUIREMENTS, SECTION 4.05.04 MINIMUM REQUIREMENTS FOR RESIDENTIAL DEVELOPMENT, SECTION 4.05.10 STANDARDS FOR RETENTION AND DETENTION PONDS, ADDING SECTION 10.03.01 (c) ADMINISTRATIVE WAIVERS FOR TREE PROTECTION, 11.05.03 INSTALLATION AND MAINTENANCE GUARANTEES FOR LANDSCAPING

Mr. Platt provided a review of the history of the proposed changes.

Member Robas inquired about the potential expansion of a wetland buffer. Mr. Platt confirmed that Staff is currently working on updating and expanding the wetland layer in GIS and will use that data to conduct a thorough analysis of this proposed amendment, to be presented at a later date.

Members discussed an email that was submitted by the Amelia Tree Conservancy recommending using the classification of “native shade tree”. Concerns were raised about locations such as Fletcher Avenue and the ability for native shade trees to thrive in high salt environments.

Members reviewed previously held discussions at PAB regular meetings and workshops and agreed on the proposed amendments.

**ACTION TAKEN: A motion was made by Member Robas, seconded by Member Stevenson to recommend approval of PAB case 2021-0013 to the City Commission; AND that PAB case 2021-0013 as presented is sufficiently compliant with the Comprehensive Plan and Land Development Code and applicable Florida Statutes to be approved at this time.**

**Vote upon passage of the motion was taken by voice vote, and being all ayes, carried.**

- 643     **CITY OF FERNANDINA BEACH, LAND DEVELOPMENT CODE TEXT AMENDMENTS (PAB 2021-14):** FLORIDA STATUTE DIRECTED MOBILE FOOD DISPENSING “FOOD TRUCKS” ADDING DEFINITIONS IN LDC SECTION 1.00.07, ADDING MOBILE FOOD TRUCK PARK AS A USE SUBJECT TO SUPPLEMENTAL STANDARDS IN LDC SECTION 2.03.02 AND PROVIDING SUPPLEMENTAL STANDARDS IN LDC SECTION 6.02.15.

Members reviewed previously held discussions at PAB regular meetings and workshops and agreed on the proposed amendments.

**ACTION TAKEN: A motion was made by Member Bennett, seconded by Member Stevenson to recommend approval of PAB case 2021-0014 to the City Commission; AND that PAB case 2021-0014 as presented is sufficiently compliant with the Comprehensive Plan and Land Development Code and applicable Florida Statutes to be approved at this time.**

**Vote upon passage of the motion was taken by voice vote, and being all ayes, carried.**

- 644     **CITY OF FERNANDINA BEACH, LAND DEVELOPMENT CODE TEXT AMENDMENTS (PAB 2021-15):** ENCROACHMENTS TO ADD DEFINITIONS IN LDC SECTION 1.07.00 FOR DECKS, BALCONIES, AND PORCHES AND AMENDING SECTION 4.02.03 (a) ADDING A PORCH ENCROACHMENT ALLOWANCE AND CLARIFYING DECK SETBACKS

Mr. Platt reviewed previously held discussions at PAB regular meetings and workshops and agreed on the proposed amendments.

**ACTION TAKEN: A motion was made by Member Robas, seconded by Member Stevenson to recommend approval of PAB case 2021-0015 to the City Commission; AND that PAB case 2021-0015 as presented is sufficiently compliant with the Comprehensive Plan and Land Development Code and applicable Florida Statutes to be approved at this time.**

**Vote upon passage of the motion was taken by voice vote, and being all ayes, carried.**

- 645     **CITY OF FERNANDINA BEACH, LAND DEVELOPMENT CODE TEXT AMENDMENTS (PAB 2021-16):** OLD TOWN DESIGN STANDARDS IN SECTIONS 8.01.01.02 (c)(3) AND (J) TO CLARIFY SPECIFIC ALLOWANCES FOR THE DEVELOPMENT OF CONNECTING ELEMENTS BETWEEN SIDE YARD AND FRONTAGE CORRIDORS

Mr. Platt provided the Board with a brief overview of the history of Old Town’s platted lots of record and why the visibility corridors are such a key design element.

**ACTION TAKEN: A motion was made by Member Bennett, seconded by Member Robas to recommend approval of PAB case 2021-0016 to the City Commission; AND that PAB case 2021-0016 as presented is sufficiently compliant with the Comprehensive Plan and Land Development Code and applicable Florida Statutes to be approved at this time.**

**DRAFT**

**Vote upon passage of the motion was taken by voice vote, and being all ayes, carried.**

**7. BOARD BUSINESS**

7.1 Elect Vice-Chair

**ACTION TAKEN: A motion was made by Member Stevenson, seconded by Member Gingher to elect Member Robas as Vice-Chair.**

**Vote upon passage of the motion was taken by voice vote, and being all ayes, carried.**

Chair Minshew stated that she felt this has been a highly productive year and thanked everyone for their dedication and energy.

**8. STAFF REPORT**

**9. PUBLIC COMMENT**

No parties wished to speak.

**10. ADJOURNMENT 7:22**

# FERNANDINA BEACH

Draft Vision 2045 Plan

## VISION STATEMENT

"Fernandina Beach is a historic waterfront island community where its environment and economy are in balance to support longstanding community values as reflected through sustainable and resilient development, embracing technological advances in public infrastructure, promoting transportation options, providing enhanced civic facilities for all ages and abilities, and cherishing its diversity and equality to further a healthy and well preserved City for future generations."

### **PUBLIC COMMENT PERIOD**

Comment period open from 12/8/21 – 1/5/22

Project Website [www.fbfl.us/vision2045](http://www.fbfl.us/vision2045)

## MISSION STATEMENT

Fernandina Beach is committed to maintaining a diverse economy which contributes to its small-town quality of life while serving as an environmental steward to protect and highlight its rich array of natural, cultural, and historic resources through demonstrated commitment to public conservation land acquisition, resilient development practices, and sound investment in infrastructure assets which improve energy efficiency and resiliency. The community strives to achieve excellence in facility accessibility and site practices by incorporating universal design solutions to support its residents and tourists. To provide increased transportation options the City commits to reducing gaps in its sidewalk and bicycle network, partnering to fund multi-use trails, supporting well designed alternative fuel station locations on city properties, and securing a reliable transit system. The City embraces building design standards which reduce impacts on the natural environment and increase community-wide resiliency through creative design in balance with private property rights. Open and inclusive engagement among all City stakeholders is supported through expanded notice requirements, increased outreach events, and staff culture committed to community service.

# THE 5 KEY THEMES

## Theme

## Goal

Environmental Sustainability & Resiliency

- Protect and increase the City's tree canopy
- Increase acreage of land dedicated to recreation and conservation
- Remove all septic tanks in the City
- Further improve protection of wetlands and coastal areas
- Increase the City's resiliency to climate change and sea-level rise

Preservation of Character

- Ensure preservation and upkeep of historic assets
- Preserve the existing building stock
- Ensure new buildings are in line with community character
- Reinforce community's social connections and small town charm

Livability

- Better balance tourism with the needs of residents
- Improve living conditions for seniors
- Expand affordable housing opportunities
- Maintain socio-economic diversity

Future Ready Infrastructure, Utilities, and Public Facilities

- Establish a resilient Smart Grid that is fully hardened against future storms, supplied by renewable energy sources, supports electric vehicles (EVs), and supported by expanded and modernized broadband infrastructure
- Ensure all City owned and/or operated public facilities will incorporate sustainable future proofing (SFP) design principles

Mobility & Transportation

- Complete sidewalk and bike networks
- Improve accessibility for senior and disabled citizens
- Establish transit options around the island
- Establish transit connections to off-island populations and jobs

Vision 2045 Comments: My husband and I think it would be an asset to downtown Fernandina if a section of Centre Street would be turned into a pedestrian only area (no traffic) which is common in most towns and cities in Europe, and in some in the U.S., such as in Boulder CO and Burlington VT. The stores and businesses benefit because people are more likely to stay and shop and eat in that area for a longer period of time.

The following form was submitted via your website: Vision 2045 Comments

Vision 2045 Comments: Theoretically, the Vision 2045 plan looks fantastic. I see nothing that I would disagree with. All aspects look like they would be in the best interest of residents and visitors and ensure the Island continues to be a wonderful place to live. I have little faith, however, that our City Council can agree on or accomplish many of these lofty goals by 2045. They seem to be indecisive about the smallest of things. I hope I'm proven wrong.

The following form was submitted via your website: Vision 2045 Comments

Vision 2045 Comments: It looks like a good overall plan. I'd like to see the COFB commit to financing conservation land purchases. Please reimplement the plan to provide \$1 million a year out of the budget for such purchases and also consider a bond issuance to purchase land. If you don't move quickly, it will be too late given the tremendous amount of development pressure currently facing the island. I am the Chair for Amelia Forever/North Florida Land Trust and I can tell you that there is tremendous support for land conservation on the part of your citizens. We managed to raise \$1.3 million in donations in ten months for our most recent conservation project. However our fund raising cannot keep up with the rapidly appreciating prices on the island and we must have a commitment from COFB as well as Nassau Co if we really want to preserve wildlife habitat and green space for on this island. Respectfully, Pam Hart

**Subject:** City 2045 Draft Vision

**CAUTION: This email originated from outside the organization. Do not click links or open attachments unless you recognize the sender, were expecting this email, and know the content is safe.**

Common Sense Fernandina Beach and City Commissioners,

*In June, the City of Fernandina Beach conducted the 2045 Survey in the Park. In the email (below), we shared observations and concerns regarding the survey. The survey asked multiple choice questions with "their preferred answers" as the only options. Tax dollars were given to put into "their" buckets – no option for "don't spend my tax dollars there". Green stickers were handed out for support but no red stickers for objections. Questions were presented with a slant and did not provide all response options, especially those with a "Don't do this" option. Did the city change anything? I don't know, they never replied to me.*

Now, this week, the city releases their [Draft Vision 2045](#) based on the bogus park survey. They are giving citizens **less than a month to respond over the Christmas and New Years Holidays!** This suggests that city management does not really want comment. Is the city looking for a rubber stamp and to vote in without people knowing? There are hundreds of pages of supporting documents on

the web site in addition to the 40 page plan to review. We need to give residents time to review it and prepare comments.

In addition, there is some very concerning terminology in the Vision and Mission statements that sound politically charged with controversial provisions: “diversity & equality”, “public conservation land acquisition”, “sound investment in infrastructure assets which improve energy efficiency and resiliency”, increased transportation options including “well designed alternative fuel stations on city property”, and “securing a reliable transit system”. We need a transit system?

One sentence in the executive summary was very enlightening (not): “Actions from the past have formed the foundation of the present and will continue to be the point of departure for development of solutions required to successfully respond to the evolving community challenges”. Whaaaaa?

This statement was interesting: the city “remains competent and capable of maintaining a leadership role to support its needs through effective and reciprocal partnerships to ensure that the City’s perspective is heard.” I’m not sure what partnerships this is referring to. City/County cooperation is not strong and the OHPA relationship is strained. The only strong relationships that the city has are with groups they control through regulation or funding. The city should aspire to build better relationships.

There are so many conflicting statements in this document that it will take quite a bit of time to review and articulate needed changes. Here are recommended actions that the city should take:

- There should be a MUCH LARGER comment window than 30 days during the holiday season. What’s the rush?
- The city should offer open public comment sessions where the public can react to what has been proposed. This should not be “3 minute” comments in the chamber but an open forum where the public can share comments “in their own words” and not be forced to choose for the city’s prescribed options only.
- This long term vision should address Section 7 of the city’s charter (safety, sanitary, health and general welfare) to determine if the city should actually be running multiple enterprises or if the city should divest of businesses that could be run more efficiently by private enterprise. Separate basic charter services from enterprise ventures to determine where the city should focus.
- The city has sought to grow dramatically over the last several years. This document seems to expand city responsibilities supporting bigger government and higher taxes. Rather, alternative options should be explored in a public forum to shrink the role of city government in order to be sustainable long-term. As stated in the executive Summary, “Sustainability is meeting the needs of the present without compromising the future.” Should the city be in the electric vehicle power business and the transportation business? The city already manages businesses/enterprises poorly – namely the Marina and the Golf Course as they both continue to lose money.
- Not addressed in this vision is the city’s financial sustainability, excessive staffing levels, lack of diversity of city tax revenues, higher tax burden on underserved communities, excessive

regulations on businesses, scarcity of affordable housing, gentrification and other themes that are chasing people and businesses away from Fernandina Beach. This vision white washes the current challenges that the city needs to improve.

- Establish a Vision 2045 steering committee like the [County's 2032 vision](#). This would create ownership among key interest groups rather than a select few special interest groups. Notably, there has never been an ask to include members of the Common Sense Fernandina Beach group in this process. Why is that?

If this document is framing our vision for the next 20+ years, we should be sure that it is inclusive, representative of the entire community, financially sustainable, not overreaching the city charter, and not growing government.

**Subject:** City 2045 Survey in the Park

Common Sense Fernandina Beach and our City Commissioners,

I applaud the city for seeking to get public opinion, but was hiring a consultant the right approach? I am concerned that the consultant is preparing something to give the city justification for more strict development guidelines that may not be based on an unbiased survey.

My impression was that the questions from the consultants were slanted to support the types of development that the city wants to encourage and to increase conservation - not really get the uninfluenced opinion of the people.

The event last Wednesday was in central park along the sidewalk. Starting at the gazebo, they handed out stickers and money and instructed people to go through the process. There were no "tests" to determine if attendees/participants were city residents, county residents or visitors.

Here are some observations:

- The first thing they did was hand out "tax" money and asked us where we wanted to

spend it. They had 6 or so slots to deposit our tax money in areas like resiliency, parks, affordable housing, infrastructure, (as I recall), I asked, what if I don't want to spend more tax money on any of these things, but would like the city to cut spending? They had no option, so I tore up my tax money and placed it on the bench. Others beside me did the same! One of the consultants asked "which projects do you NOT want to spend money on" and she proceeded to write my comments on the torn up tax money.

The intentions were good, but the choices presented did not reflect enough options.

- Next they handed out green stickers. No red stickers. Green stickers were provided to place on the placards/boards along the sidewalk for projects or preferences that you wanted to support. There was NO place to express negative support. Some signs/placards had a hand written section with "NO" written and a few green stickers placed there.
- Chip was heckling residents at one of the voting boards. I observed someone placing a sticker on a sign that Chip was crowding. He started heckling them for their choice. Seriously? Why was he trying to influence people to place or not place their green stickers? Whether he thought he was influencing or not, his close presence and comments were impactful.
- One board asked "what type of development do you like" with various houses, condos, apartments, businesses pictured. How is one to answer this because it depends on the place where the development is happening?
- The board about parking included a box saying (I'm paraphrasing) do you want a parking deck and in parentheses "any parking deck would cost substantial public money". This is a totally incorrect. Dale Martin has been approached by a developer who offered to build a parking deck for FREE. He refused. The city would provide the land, the developer would build the deck at no cost to the city, the developer collects parking fees to pay for the deck and then turn over to the city to collect fees going forward. That is a PPP – public private partnership model that costs the city nothing, yet, it solves a problem and creates a long term revenue stream for the city. Why was this approach not a question presented so that I could put a green sticker on it?
- Quality/Accuracy. This effort is presented as a scientific way to capture the "will of the people" costing the city taxpayers hundreds of thousands of dollars for the "consultant" to run a survey/data capture process that they will read back to the PAB and the city commission to update the comprehensive plan. Since people are told "only put one sticker in each block" at the beginning, I'm sure that everyone adhered to the rules. Limited questions. Limited answers. Slanted approach.

The intentions of this process were right on the mark. We need to gather information about what the residents want in our community. The choices presented included or missing by the consultants is giving me pause in the resulting outcome.

The City people there who were answering questions did a fantastic job, and I was pleased to

see most of our city commissioners there participating and talking with residents.

Jack

Vision 2045 Comments: The city should work to create and enforce stronger growth management plans that protect what draws people to this area to begin with. Strip malls that sit with 30% occupancy directly across the street from new strip mall construction is wasteful, nonsensical, depreciative, and downright depressing. Also, give residents and tourists alike more places to enjoy community assets like the waterfront.

<http://www.fbfl.us/Admin/FormHistory.aspx?SID=9406>

The following form was submitted via your website: Vision 2045 Comments

Vision 2045 Comments: I understand that we need a vision for the future. We also need a plan for the immediate. As we plan parks and walkways with no way to pay for them except through taxing our small city resident tax base, the things that we've already built fall into disrepair. The city tennis courts are a good example. The cracks in the concrete there are a lawsuit waiting to happen. Part of our vision should be new ways to pay for things other than through the city taxpayers. There should be paid parking downtown, at least in part. Build a multi-story paid parking lot on the site where City Hall is now. Non-Nassau County residents should pay to park on our beaches. That alone would generate much more than it costs to maintain and patrol our beaches. You should not consider all of the wonderful things we want to add to our community without figuring out how it will be paid for.

Happy New Year Mayor and Commissioners,

I have a few brief comments/thoughts on the circulated Vision Plan for tomorrow's workshop. Thanks for taking a look.

- **The Vision Statement** attempts to summarize the themes. Theme 2 is Preservation of Character, yet preservation is barely mentioned in the abbreviated statement. Preservation of both the historic natural *and* built environment could be better incorporated.
- Not sure if vision statements are always constructed in the present, but I challenge the statement that our "environment and economy are in balance." That sounds more like a goal.
- Should there be mention we are a Barrier Island Community in the Vision Statement, as this brings certain conditions and responsibilities with this uniqueness?
- **Theme 2 Preservation of Character** makes no acknowledgment to the history of or the preservation/promotion of our working waterfront roots.
- **Theme 4 Infrastructure/Utilities** Do we really not have any solar energy and/or clean, renewable energy goals in the next 25 years???
- **Theme 5 Mobility and Accessibility:** we are a two mill town with a port all of which significantly affect the traffic and mobility through town. Should there be mention of this along with co-creating traffic management plans with these entities and maintaining these key relationships? Acknowledge the Port Master Plan and a working relationship there?
- **Good Government theme missing:** they key to making any of the above a reality is a strong, reliable, trustworthy, well-functioning city government

Looking forward to 2022 and a new year ahead! See you soon. Thanks for what you all do!

January 3, 2022

Kelly Gibson  
Planning Director  
204 Ash St  
Fernandina Beach FL 32034

Dear Ms. Gibson:

We have reviewed the Draft 2045 Vision Plan and offer the following comments for your consideration.

We are pleased that the report considers feedback from the over 1,000 participants in the visioning surveys and meetings, including our industry-focused meeting with the City Planning staff and WGI.

The Vision Plan describes the foundation for a resilient City, and WestRock's Fernandina Beach operations contribute to the economic resiliency of our local community. A 2016 study by the University of Florida estimates that the WestRock and RYAM mills contribute over \$1,200,000 annually to the local economy and support over 4,000 local jobs.

We also note the many public comments and emerging theme from the community recognizing the unique character of Fernandina and how WestRock's operations in the city contribute to that uniqueness. The Visioning Theme (#2) "Preservation of Character" to preserve the uniqueness of Fernandina through balancing tourism and residential should include a third component preserving a healthy industrial base that provides high-wage jobs and stable employment within the island economy.

We appreciate the recognition of the importance of maintaining a good working relationship with "the mills" and support for a diverse economy highlighted in Theme #3 "Livability."

It is important to note that one of the five major themes identified is "Future Ready Infrastructure and Utilities" under Theme #4, and the Objective to achieve that goal is "hardening against future storms." WestRock's current Mill energy infrastructure supports the resiliency of the City's energy grid with our ability to provide power generated onsite to the grid in the event of a disruptive tropical weather event.

WestRock is exploring a partnership with Florida Public Utilities (FPU) to establish a cogeneration facility like the existing "8 Flags" project. Our energy program and possible future partnership with FPU is congruent with the stated goals and objectives of resiliency, public safety, and economic diversity, and builds on the City's support of cogeneration energy projects noted under Theme #4

WestRock looks forward to our continued dialogue with the City to transition the LDC/Comprehensive Plan and incorporate the findings of the 2045 Visioning Plan.

Sincerely,

Eric Schmidt  
Community Relations Manager

CC: Jake Platt City Planner  
Dan Rowland-Mill General Manager

## Alternative Proposals Submitted

“Fernandina Beach is a historic island community which strives to provide its citizens an excellent quality of life while protecting resources for the future.”

"The City of Fernandina Beach is committed to preserving its diverse history, its family friendly small town America lifestyle, while embracing the advantages of technology and healthcare through City and community services as they are developed. We are also a community that offers a warm welcome to our many visitors."

# Statement of Vision

“Foster a thriving small-town atmosphere in which civic pride, personal well-being and a balanced economy are nurtured and protected.”

# FERNANDINA BEACH

Draft Vision 2045 Plan

# VISION STATEMENT

*"Fernandina Beach is a historic waterfront island community where its environment and economy are in balance to support longstanding community values as reflected through sustainable and resilient development, embracing technological advances in public infrastructure, promoting transportation options, providing enhanced civic facilities for all ages and abilities, and cherishing its diversity and equality to further a healthy and well preserved City for future generations."*

# MISSION STATEMENT

*Fernandina Beach is committed to maintaining a diverse economy which contributes to its small-town quality of life while serving as an environmental steward to protect and highlight its rich array of natural, cultural, and historic resources through demonstrated commitment to public conservation land acquisition, resilient development practices, and sound investment in infrastructure assets which improve energy efficiency and resiliency. The community strives to achieve excellence in facility accessibility and site practices by incorporating universal design solutions to support its residents and tourists. To provide increased transportation options the City commits to reducing gaps in its sidewalk and bicycle network, partnering to fund multi-use trails, supporting well designed alternative fuel station locations on city properties, and securing a reliable transit system. The City embraces building design standards which reduce impacts on the natural environment and increase community-wide resiliency through creative design in balance with private property rights. Open and inclusive engagement among all City stakeholders is supported through expanded notice requirements, increased outreach events, and staff culture committed to community service.*

# THE 5 KEY THEMES

# Executive Summary

Growing, charming, appealing, and special are often the words we hear to illustrate Fernandina Beach today. Protected, natural, and united are what we hear to define its future. It comes as no surprise that these words both balance and reflect the community they describe.

Fernandina Beach is a vibrant, thriving waterfront city in Northeast Florida. A city which is not still. It's a community whose evolving cultural, historic, and natural riches are evident along every street, neighborhood, park, and coastline. Reaching beyond the aesthetic beauty of this physical place are the people who live here and bring forth the warmth and friendship that make this a community.

Fernandina Beach has historically embodied balance and inclusivity in its population. Generations of families from an expansive range of wealth and racial backgrounds have made this community what we see today. As the world, the Nation, the State, and Nassau County continue to change and to grow, so will Fernandina Beach.

Fernandina Beach, like many other coastal communities, faces the pressures of rapidly escalating living costs, vulnerability from climate change, and pressure to develop its remaining natural environment. Actions from the past have formed the foundation of the present and will continue to be the point of departure for development of solutions required to successfully respond to the evolving community challenges. It is widely recognized that the community must take a holistic approach to make possible a future that reflects cherished values and preserves its most desirable features in a fast-growing County. The City's position and its value as a political subset of the County has changed over the past two decades, but it remains competent and capable of maintaining a leadership role to support its needs through effective and reciprocal partnerships to ensure that the City's perspective is heard. As the City moves through the next 25 years, the 2045 Vision serves to articulate Fernandina Beach's actionable mission and an implementing strategic plan with measurable goals and objectives.

The foundation of Fernandina Beach's 2045 Community Vision Plan is resiliency, sustainability, and preservation. Resiliency is simply described as the ability to bounce back to normal after a disruption (environmental, economic, or natural). To be resilient, the City must be proactive and diligent while working with its community partners and governmental agencies. Sustainability is meeting the needs of the present without compromising the future. This is achieved by taking demonstrable measures to balance community values, despite a changing population, without risking the small-town feeling so many have come to enjoy. Preservation is a process of maintaining and safeguarding against future damage. Through focused and swift action to preserve and protect its most critical natural and cultural features, the City will support the desired ambiance of Fernandina Beach in 2045.

To achieve this future, the City of Fernandina Beach must:

- build on forward-thinking strategies established to address its vulnerabilities and preserve its natural and cultural assets,
- continue to place the community and its residents first when making decisions,
- be a partner-leader in the community, region, and state to demonstrate commitment to values and communicate evolving needs, and
- take a balanced approach when making decisions that affect the historical fabric and structure of our city while meeting the future needs of our residents and businesses.

With this focus, the Fernandina Beach of 2045 will be a place where children raised here will return to raise their families, where newcomers are warmly greeted after a long career, and where those who have lived here for generations can still see and feel the community that they have always loved to call home.

# 01 THE VISION

## I. THE SHARED VISION

Developing a shared vision for the future is a challenging task, especially for communities as diverse and dynamic as Fernandina Beach. Every member of the community has their own views on how the City should evolve in the future and finding a shared vision can be onerous. The Vision 2045 public outreach process gave citizens of Fernandina Beach the chance to express their vision for the future of the City. This extensive and exhaustive process allowed the team to better understand what the people want their community to be like in the next 25 years.

### A. Building the Vision

The vision is built from the shared input from the public, stakeholders, and City officials. Data and input from the planning workshop, surveys, presentations, outreach efforts, and stakeholder interviews was thoroughly analyzed to identify common themes, hopes, and aspirations for the future Fernandina Beach. Three major themes arose during the analysis that acted as a common thread throughout the different aspects of the public input process. These themes were resiliency, sustainability, and preservation.

### B. The Vision's Foundation

Resiliency, sustainability, and preservation form the foundation of vision.

#### Resiliency

Resiliency has become a major concern among communities in the last 10 years. This is especially true for coastal communities. In the past decade, Fernandina Beach has experienced an economic recession, global pandemic, sea-level rise, hurricanes, rise of new technology,

and increasing development, gentrification, displacement of low-income and minority residents, and population growth.

Resiliency is “the ability of a piece of infrastructure, system, environment, or community to sustain or recover its essential functions when presented with a disruption.” These disruptions can be environmental (sea-level rise, coastal erosion), economic (recession), or a natural or man-made disaster (hurricanes, oil spills, and pandemics). Resilient communities are able to bounce back from a disruption or disaster quicker and more easily return to normal life.

True resiliency looks at economic resiliency, social resiliency, and environmental resiliency. These three elements make up the triple bottom line and give the city a broader perspective on how different aspects of the community are affected by disruptions. Looking through the lens of the triple bottom line also allows a holistic recovery and prevents sacrificing one of the elements for the progress of another.

Environmental resiliency looks at how the City can better prepare itself for environmental disruptions such as sea-level rise, climate change, coastal erosion, and future hurricanes. This is a key issue due to the City's vulnerability to these disruptions.

Economic resiliency will analyze how the City can better position itself to recover from an economic downturn, adapt to changes in technology, and better compete with up-and-coming communities off-island and in the greater Jacksonville area.

Social resiliency looks at how all members of the community can prosper in the future. This includes identifying the social threats of gentrification and how lower-income and minority residents can adapt and remain a part of the Fernandina Beach community.

Sustainability and preservation also use the triple bottom line to identify the best strategies.

### Sustainability

Sustainability is “meeting the needs of the present without compromising the ability of future generations to meet their own needs”. Sustainability in the context of the Vision2045 is identifying how Fernandina Beach can operate and improve in a way that doesn’t diminish the quality of life for our children and grandchildren that want to call this place home.

### Preservation

Preservation is “the process of keeping something safe from damage or deterioration”. Preservation includes preservation of the natural environment (conservation), historic/cultural traditions, and the built environment. The preservation aspect of the plan identifies what the people love about Fernandina Beach and identifies strategies and plans to preserve those elements for future generations.

By looking at solutions through an economic, environmental, and social lens, we are able to ensure that Fernandina Beach will be an equitable and prosperous City for all of its citizens.

## II. THEMES & GOALS

### A. Purpose

Five themes arose from discussion with the public, stakeholders, and city leadership. These ideas are

1. Environmental Sustainability & Resiliency
2. Preservation of Character
3. Livability
4. Future Ready Infrastructure, Utilities, & Public Facilities
5. Mobility & Transportation

Chapter 2 introduces each of the five themes and goals to support the themes. Included is an introduction to the theme, a brief summary of the stakeholder input that lead to the development of the goals, and how the City is already supporting those goals. A more detailed analysis of the public input supporting the goals can be found in Appendix B.

Projects and recommendations were developed to accomplish each of the goals. A timeline for implementation of each project or recommendation is provided in Chapter 2 with further detail on the implementation in Chapter 3.

| Theme                                                         | Goal                                                                                                                                                                                                                                                                                                                                                                                                                 |
|---------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Environmental Sustainability & Resiliency                     | <ul style="list-style-type: none"> <li>▪ Protect and increase the City's tree canopy</li> <li>▪ Increase acreage of land dedicated to recreation and conservation</li> <li>▪ Remove all septic tanks in the City</li> <li>▪ Further improve protection of wetlands and coastal areas</li> <li>▪ Increase the City's resiliency to climate change and sea-level rise</li> </ul>                                       |
| Preservation of Character                                     | <ul style="list-style-type: none"> <li>▪ Ensure preservation and upkeep of historic assets</li> <li>▪ Preserve the existing building stock</li> <li>▪ Ensure new buildings are in line with community character</li> <li>▪ Reinforce community's social connections and small town charm</li> </ul>                                                                                                                  |
| Livability                                                    | <ul style="list-style-type: none"> <li>▪ Better balance tourism with the needs of residents</li> <li>▪ Improve living conditions for seniors</li> <li>▪ Expand affordable housing opportunities</li> <li>▪ Maintain socio-economic diversity</li> </ul>                                                                                                                                                              |
| Future Ready Infrastructure, Utilities, and Public Facilities | <ul style="list-style-type: none"> <li>▪ Establish a resilient Smart Grid that is fully hardened against future storms, supplied by renewable energy sources, supports electric vehicles (EVs), and supported by expanded and modernized broadband infrastructure</li> <li>▪ Ensure all City owned and/or operated public facilities will incorporate sustainable future proofing (SFP) design principles</li> </ul> |
| Mobility & Transportation                                     | <ul style="list-style-type: none"> <li>▪ Complete sidewalk and bike networks</li> <li>▪ Improve accessibility for senior and disabled citizens</li> <li>▪ Establish transit options around the island</li> <li>▪ Establish transit connections to off-island populations and jobs</li> </ul>                                                                                                                         |

# 02 THE THEMES

## I. THEME 1: ENVIRONMENTAL SUSTAINABILITY & RESILIENCY

### What We Heard

Conservation of the natural environment was by far the number one concern brought up during public outreach. Protection of environmental assets consistently polled high in the online surveys, as well as during the planning workshop.

### What We Are Doing Now

- Created City Tree Committee (CTC)
- Considering CTC recommendations for LDC Amendments
- Heritage Tree Program
- Tree replacement requirements
- Strong tree ordinance with mitigation requirements & strict penalties
- Hired urban forester/arborist in 2018
- Tree Management Plan 2019-2024
- City sponsored tree giveaways
- Established wildlife corridors
- Wetland fill prohibited in the Comprehensive Plan and LDC
- Established wetland buffers at 25 feet from delineation line
- Established Conservation Land Trust Fund in 2018
- Designation of 127 acres as conservation or recreation in 2021
- Revising criteria for nominating land for conservation
- Dune Management Program
- Funding obtained for Habitat Beach Conservation Plan
- Policy 5.08.06 in the Comprehensive Plan establishes wetland buffers and transition areas
- Policy 5.14.6 and 5.14.7 of the Comprehensive Plan encourages dedication to conservation easements but don't identify an incentive
- Policy 5.02.04 of the Comprehensive Plan calls for continual evaluations of Coastal Upland Protection Zone (CUPZ) and to adjust if needed
- Policy 5.07.06 of the Comprehensive Plan says the City shall consider expanding CUPZ to include more of Egan's Creek
- LDC requires Florida Friendly and drought tolerant landscape plans for new development
- Landscape buffer requirements in the LDC
- Objective 1.02.05 of the Comprehensive Plan encourages screening standards
- Objective 1.03.07 of the Comprehensive Plan protects scenic vistas
- Developing a Waterfront Resiliency Master Plan
- Policy 5.03.05 calls for a Post Disaster Redevelopment Plan that limits development in areas prone to storm surge
- Partner with Nassau County for Community Rating System (CRS) events and outreach opportunities
- Active participation in Local Mitigation Strategy (LMS) review of projects and priorities
- City leadership and staffing presence at activated Emergency Operations Center

## THEME 1 : Environmental Sustainability &amp; Resiliency

| GOAL                                                                                                       | Urgent / Quick Win                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Short-Term                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Mid-Term                                                                                                                                                                                                                                                                           | Long-Term                                                                                        |

## II. THEME 2: PRESERVATION OF CHARACTER

### What We Heard

The evolving character of the City was a major concern identified in the outreach activities along with a desire to preserve Fernandina Beach's unique culture, aesthetic, and community.

### What We Are Doing Now

- Architectural & design standards for Historic District and Old Town
- Identified contributing structures in Historic Districts
- Several buildings registered on the National Registry of Historic Properties (NRHP)
- Tax incentives for historic properties in historic districts (Sec. 74-151 and 74-152 through 74-167 of the LDC)
- Building code standards for non-historic district parcels
- Objective 1.2.6 of the Comprehensive Plan encourages character and density of new development be consistent with surrounding neighborhood
- Objectives 1.2.12 and 1.2.13 of the Comprehensive Plan protect the Historic District and require overlay requirements to protect character
- Objectives 11.3 and 11.08 of the Comprehensive Plan encourage reuse of existing building stock
- City published "Properties of Concern" list
- Developed Bosque Bello Cemetery Master Plan
- Pursuing for NRHP for Bosque Bello Cemetery
- City adopted non-discrimination Ordinance protecting sexual orientation and gender identity

| THEME 2 : Preservation of Character                                                                                                                      |                                                                                                         |                                                                                                                                                                            |                                                                                                                          |                                                                                                                                                                                 |

### III. THEME 3: LIVABILITY

#### What We Heard

Economic and social resiliency issues were prevalent during discussions with City leadership, stakeholders, and the general public. These issues include the lack of affordable housing options, accessibility obstacles, and support for aging in place.

#### What We Are Doing Now

- Bed tax for Amelia Island is at 5%
- Short term vacation rental regulations
- Objective 11.3.15 of the Comprehensive Plan encourages historic and cultural tourism
- Objective 12.4 of the Comprehensive Plan promotes year-round tourism that balances needs of citizens and tourists
- City has conducted parking studies that show there is no parking deficit right now but that could change with further growth.
- SR 200/A1A Corridor Master Plan being conducted by the County
- Public housing is available within City limits
- Affordable housing bonus program
- Accessory dwelling units (ADUs) allowed everywhere except for Old Town
- City waives impact fees for affordable housing projects
- Housing Authority advises Commission on affordable housing
- Objective 3.3 of the Comprehensive Plan supports increased inventory of affordable housing options
  - Policy 3.1.2 encourages the City to promote a mixture of housing types
  - Policy 3.3.1 says the City needs to routinely examine the LDC to ensure it doesn't create barriers to affordable housing
- Paratransit Program through Council on Aging
- Senior meet & greet, senior trips, and fitness classes at Atlantic and MLK Center offered through the Parks and Recreation Department
- Policy 3.3.5 of the Comprehensive Plan states City will adopt LDC regulations that allow seniors to age in place
- City supports a diversified economy
- Good working relationship with the Mills
- Working with industrial and commercial entities to ensure new developments or investments do not hamper the working waterfront
- Working waterfront defined in the Comprehensive Plan
- Objective 2.11 of the Comprehensive Plan ensures protection of working waterfront
- Objective 5.5.14 of the Comprehensive Plan ensures riverfront development be compatible with the working waterfront

| THEME 3 : Livability                                                                                                                         |                                                                                                                        |                                                                                                                                                                                                                                                                                                                |                                                                                                                     |                                                                                                            |

## IV.THEME 4: FUTURE READY INFRASTRUCTURE, UTILITIES, & PUBLIC FACILITIES

### What We Heard

A major theme discussed by City leaders was the need to reinvest in the City's infrastructure in a way that sets Fernandina Beach up to thrive in the future.

This is accomplished through future-proofing the City's utilities and assets. Future ready infrastructure and facilities meet our current needs, while being flexible, reliable, and scalable to handle future requirements and technologies. This can refer to smart grids, electrical vehicle charging networks, expanded broadband and fiber for working at home, and decentralized power production.

This goal will ensure that the City's infrastructure is adaptable to future needs and technologies.

### What We Are Doing Now

- Policy 11.4 of the Comprehensive Plan says the City shall encourage use and production of renewable energy
- Policy 3.6.2 of the Comprehensive Plan says the City will encourage use of renewable energy in residential structures
- City approved the Cogen plant at Rayonier
- Currently switching City street lights to LEDs
- Policy 11.6.5 of the Comprehensive Plan says the City will encourage burial of utilities in the historic areas
- AT&T currently supplies broadband on Amelia Island
- Policy 12.6.4 of the Comprehensive Plan says the City will investigate availability of broadband service via existing providers, wireless networks, or municipally owned facilities to support expansion
- Conducted a financial analysis on costs of new City Hall vs renovating the existing building
- Policy 2.13.7 the Comprehensive Plan calls for full ADA compliance in all parking lots
- Conceptual design for Waterfront Park approved in 2009, revision approved in 2012
- Conducted Cost Analysis for Waterfront Park
- Engineering drawings for Lot B unveiled in 2016
- Approval for engineering design of Front Street in 2019

## V. THEME 5: MOBILITY & ACCESSIBILITY

### What We Heard

Mobility, traffic, and parking were the second most significant concerns of the public following conservation. Residents, stakeholders, and City leadership voiced throughout the public participation process that the ability to safely and comfortably walk and bike around the City was a primary desire. Amelia Island is recognized as a “Bike Friendly Community” and maintaining and building on that success going forward is a goal for the City.

### What We Are Doing Now

- Fernandina has a system of bike lanes and multi-use paths
- City is connected to the rest of the island via the Amelia Island Trail
- Amelia Island certified “bike-friendly community”
- Paratransit service for seniors operated via Council on Aging
- NassauTRANSIT runs express buses between major county communities and to Jacksonville
- Objective 1.5.4-1.5.5 of the Comprehensive Plan encourages redevelopment into walkable/mixed use areas
- Objectives 1.6.3 of the Comprehensive Plan calls to identify areas to become Neighborhood Planning Areas or issue heritage/conservation overlays
- Objective 1.6.7 and 1.8.4-1.8.6 of the Comprehensive Plan calls for use overlays to transform suburban corridors into mixed use corridors

# 03 IMPLEMENTING THE VISION

## I. IMPLEMENTATION STRATEGY

### A. Types of changes

The projects and recommendations identified for each goal in Chapter 2 fall into 7 main categories. They will either require modifications to the Comprehensive Plan, LDC, or zoning regulations; establishment of a new City program or service; undertake an additional planning study; require a partnership with another entity, outreach or engagement with a community; action by the City government; or inclusion into the City's Capital Improvements Plan.

#### Comprehensive Plan or LDC Update

The Comprehensive Plan is the foundation for determining future land uses, transportation strategies, housing policies, conservation efforts, and funding for projects and programs. Florida requires cities to keep their comprehensive plans up to date. Ensuring that elements in the Vision 2045 Plan are incorporated into the Comprehensive Plan is essential to ensure that all projects and recommendations are in line with the community's long-term plan.

The Land Development Code (LDC) standardizes specific zoning and development regulations such as land use, density, height, parking, architecture, and site plan layout. The LDC's specific and legally binding requirements for development are the primary driver on how a development looks, functions, and operates. Updates are needed to the code to ensure that future development and redevelopment are in line with the Vision and Comprehensive Plans.

#### New City Program

Some recommendations call for the creation of a new City-funded program or new staff position. Some of these recommendations may be handled by existing staff but others may require the hiring of new employees to carry out the program's functions.

#### Additional Planning Study

The Vision Plan offers broad and high level recommendations. Some objectives recommend further analysis or an additional planning study to dig deeper and more thoroughly than the Vision Plan analysis.

#### Action

Project requires an action or designation from the City.

#### Partnership

Several recommendations are for the City to collaborate with other entities or organizations to archive a common goal while the City acts as the project's prime.

#### Outreach & Engagement

Some recommendations are focused around outreach and engagement of underrepresented communities and populations.

#### Capital Improvements Project

Capital improvements are major investments or upgrades to public infrastructure or a public facility. Projects that fall under this category include major streetscape projects, new pedestrian or bike infrastructure, and construction of new parks or City-owned buildings.

| THEME 1 : Environmental Sustainability & Resiliency                                                                                                                               |                           |             |        |            |          |           |         |                                                                                                 |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|-------------|--------|------------|----------|-----------|---------|-------------------------------------------------------------------------------------------------|
| Project or Recommendation                                                                                                                                                         | Type                      | Phase       | Urgent | Short-Term | Mid-Term | Long-Term | Funding | Partners                                                                                        |
| GOAL: Protect and increase the tree canopy                                                                                                                                        |                           |             |        |            |          |           |         |                                                                                                 |
| Create a Tree Management Plan with data from City Tree Committee (CTC) Report                                                                                                     | Additional Planning Study | Proposed    | X      |            |          |           |         | City Tree Committee                                                                             |
| Allow for administrative review of design standard deviations when certain trees can be preserved                                                                                 | Comp Plan/LDC Update      | Not Started | X      |            |          |           | N/A     | City Tree Committee                                                                             |
| Identify areas for potential planting areas in parks, rights-of-way, retention ponds, the golf course, and local schools                                                          | Additional Planning Study | Proposed    | X      |            |          |           |         | City Tree Committee<br>Keep Nassau Beautiful                                                    |

# A : EXISTING CONDITIONS

## I. HISTORY

### Founding by the Spanish Empire

Fernandina Beach is a city rich in history. Known as the Isle of 8 Flags, the city has been a possession of 8 different nations since its founding. This has created a melting pot of cultures that is reflected in the city's architecture, cityscape, and public traditions.

Fernandina Beach was founded in 1811 by Spanish colonists and named after King Ferdinand VII. It was the last city to be platted under the "Law of the Indies" and the final city to be established by Spain in the Western Hemisphere.

The original settlement was established approximately one mile north of present-day downtown Fernandina Beach. The 1811 plat organized the new town in a traditional grid, consisting of city blocks measuring 200 ft x 250 ft. A public plaza, a major element of Spanish colonial town planning, was established in the center of the new town. Fort San Carlos stood between the plaza and the waterfront, protecting the city and port from naval aggressions from an expanding United States. This fortress, constructed of wood and earthworks, has eroded over the years. The original street grid and public plaza (Fernandina Plaza Historic State Park) are all that remain of the original Spanish settlement.

### Relocation South and the Railroad

Fernandina Beach relocated one mile south in the 1850s to take advantage of the new Florida Railroad built by David Yulee that terminated on Amelia Island. The new town center developed around its railroad station, which still stands today as the Amelia Island Welcome Center, and became an important transportation center in northern Florida.

In 1857, David Yulee platted the new town of Fernandina Beach. The new city layout was modeled off of New York City. The plan laid out the City in a traditional grid with city blocks approximately 400 feet by 250 feet. A large public park was designated in the center of the city to act as Fernandina Beach's version of Central Park. Davis Yulee envisioned the City would become the "Manhattan of the South".

The Civil War broke out before David Yulee was able to develop his vision for the City. Confederate forces took over nearby Fort Clinch which eventually housed six companies of troops. The City fell to Union troops the next year and became a primary destination for freed slaves during the rest of the War.

Fernandina Beach's African American population grew after the end of the Civil War. Hundreds settled in the City and several Black ministries and churches were founded including New Zion Missionary Baptist on South 9th Street. Black citizens began to be elected to City offices in part due to the City's large African American population until the State legislature redistricted the City to benefit White citizens. Segregation laws were introduced in the 1890's.

## Growth & Prosperity

Fernandina Beach entered a period of growth and prosperity in the last quarter of the 1800's. In this period, the City established a robust tourism industry, expanded the port, and became a primary trading center connecting the cotton and timber industries with maritime shipping routes.

The historic wealth and prosperity of the town is reflected in the local architecture and cityscape. Fernandina Beach possesses a large concentration of nineteenth century residential architecture and the downtown area is rich in revival and romantic architectural styles.

Photo: Newly Built Courthouse, 1892  
(Source: Courthouse History)

The city continued to grow with the establishment of the Kraft Corporation Paper Mill in the late 1930's. Other industries followed and built-up Fernandina Beach's modern-day industrial port. The city reached a population of 7,000 in the 1960's. This population growth led to the development of new residential areas east of the historic downtown area towards the oceanfront. While most of the newer residential areas continued to utilize a traditional street grid, some of the developments in the southeast part of the city were designed in a more standard, suburban style.

## Fernandina Beach Today

The city began to focus on historic preservation efforts in the 1970's, establishing new guidelines and encouraging restoration of historic structures. Today, the cityscape of Fernandina Beach is a rich tapestry of historical architecture that makes it a beautiful and unique place in the modern world.

## II. 2030 COMPREHENSIVE PLAN

### A. Plan Structure

Fernandina Beach adopted the 2030 Comprehensive Plan in 2002 to guide development of the City over the proceeding 15-25 years. The plan addresses the following 12 main topics that influence the City's physical development.

1. Future Land Use
2. Multi-modal Transportation
3. Housing
4. Public Facilities
5. Conservation & Coastal Management
6. Recreation & Open Space
7. Intergovernmental Coordination
8. Capital Improvements
9. Port Facilities
10. Public Schools
11. Historic Preservation
12. Economic Development

Every seven years the City updates the Plan through an Evaluation and Appraisal Review report (EAR). Based on legislative changes, the City's EAR deadline was 2019. The purpose of the EAR is to evaluate progress the City has made towards the goals laid-out in the Comprehensive Plan, update for legislative changes and allows amendments to address new issues and identify new opportunities. The 2019 EAR directed changes based on state level legislative action to address seasonal population impacts, water supply planning, and flood resiliency. Plan amendments were finalized in 2020. Following these changes, the

Photo: 2030 Comprehensive Plan (Source: WGI)

City Commission directed action to review and determine if holistic changes were needed to support its goals in better addressing climate change vulnerabilities, update plan time frames, and to determine if certain policies were no longer relevant.

### B. Plan Legacy

The 2030 Comprehensive Plan was implemented in several key areas. The City established a Land Development Code Working Group which identified priority areas for directing changes. The first and most successful was the 8th Street Mixed Use Overlay with corresponding new land use and zoning map changes. Following success in achieving goals for improvement along 8th Street, the city focused on its downtown core to evaluate residential densities to better support re-use of existing structures. Changes to the

Land Development code were also brought forward to allow for more expansive Accessory Dwelling Units in support of multi-generational living and aging in place policies. Another key measure that was fully implemented was the reduction of impervious surfaces by setting caps on required parking, adding parking flexibility standards, and limiting impervious material for parking areas. The City made changes within its table of land uses to include modern language for various uses and needs and aligned its industrial zoning designations to better reflect their allowable intensities. Also completed, were changes to support needs within the established Community Redevelopment Area. Calculation of building heights to address floodplain properties and concerns with mechanical equipment encroaches were another significant implementation measure. The City completed several, but not all of the directed studies or plans within the Plan.

Additional implementation efforts of the City have been witnessed in its organizational structure. The City has created a Stormwater Department during this time frame who have completed several significant projects and provided expertise in stormwater planning. In 2019, the City established specific right-of-way standards for roadway development. The City created a new chapter in its Land Development Code to specifically address properties within Historic Districts. Updated permanent and temporary signage regulations have been addressed following recent Supreme Court decision making. The City has made numerous significant changes to protect its urban forest through code amendments to increase mitigation requirements and penalties. Further, the City committed to the hiring of an urban forester/ city arborist and has maintained this position since 2018.

The City adopted an its Conservation Land Trust Fund in support of its public land acquisition program in 2018 and has aggressively made changes to its Future Land Use Map and Zoning Map to reflect Conservation status on properties owned by governmental agencies and on private properties on 129 acres of land. Additionally, the city has purchased almost 20 acres of land. The city maintains an active partnership with the North Florida Land Trust to support its conservation acquisition efforts.

Despite these meaningful changes and action taken to implement the 2030 Comprehensive Plan, many items remain incomplete. Specific areas that require greater focus leading into the next planning horizon include:

- implementation of the City's goals for multimodal transportation options,
- addressing climate change vulnerabilities through establishment of Adaptation Action Areas
- consideration of form-based solutions to direct residential and non-residential character including standards for Planned Unit Developments,
- creation of a City context low impact development manual, and developing standards for cluster development to better protect natural features on individual lots, and
- determine solutions for neighborhood level planning needs and outreach.

### III. MAP OVERVIEWS

#### A. Existing Built Environment

The built environment of Fernandina Beach is comprised of three primary development patterns. Old Town, the Historic District, and the residential neighborhoods adjacent to Atlantic Avenue, the Middle and High Schools, and the Peck Center are developed as traditional urban neighborhoods. These are the oldest parts of the City and are defined by their smaller blocks and intact street grid network. The residential area centered around North Fletcher Avenue is also constructed in a traditional urban neighborhood fashion. These areas are considered the City's most walkable and pedestrian friendly.

Many of the newer residential neighborhoods constructed in Fernandina Beach follow a sprawling suburban style of development with limited entry points into the neighborhood and several dead-end streets terminating in cul-de-sacs. These areas contain predominately detached single-family homes of similar age and architectural style. These areas are car-centric in design and geographically separated from other uses such as shops and restaurants.

The areas around 5 Points, South 14th Street, and Saddler Road are constructed in a Suburban Commercial development pattern. These areas are dominated by big-box stores with large parking lots, stand alone fast food restaurants, and shopping plazas. Buildings are set back from the road with parking located between the business and street. They are car-centric areas with limited pedestrian or bicycle infrastructure.

Traditional Urban Neighborhood

Suburban Residential Development

Suburban Commercial Development

Beaches Development

Table A.1: Future Land Use

## B. Future Land Use Map (FLUM)

The FLU plan reinforces the uses established in the current zoning code. Table A.1 shows the percentage of land area of each FLU category in the City and Figure A.1 illustrates their location. Recreation and environmental conservation encompass large areas of the City including Fort Clinch State Park, acres of wetlands, and the Fernandina Beach Golf Club. Residential development is relatively evenly divided between low- and medium-densities with a few high-density residential areas located on the oceanfront. Industrial is identified along the Amelia River waterfront while the municipal airport and surrounding areas in the south of the City are identified as Public/Semi-Public FLU. Mixed use districts are found in the downtown core and along South 8th Street.

Figure A.1: Future Land Use Map (FLUM)

Table A.2: Zoning Districts

### C. Current Zoning Map

Fernandina Beach has a traditional Euclidean or use-base code. Table A.2 shows the percentage of land area of each zoning category in the City and Figure A.2 illustrates their location. The largest zoning districts are recreation, environmental conservation, and residential with large areas dedicated to industry and municipal uses. While most of the city is zoned for a single use, some districts do allow for mixed use developments including C-3, MU-1, and MU-8 as shown in Figure A.2. These areas are located near the downtown core and along South 8th Street.

Figure A.2: Zoning Map

## D. Cultural Amenities and Historic Structures

Fernandina Beach is rich in historic and cultural assets. Ten structures and sites within the City boundaries are listed on the National Register of Historic Places (NRHP) as shown in Figure A.3. Downtown Fernandina Beach and the Old Town contain a mosaic of architectural styles and elements that reflect the City's history. As illustrated in Figure A.4, 242 buildings are considered architecturally contributing structures to the district. These areas are protected in the LDC with additional design standards to preserve the architectural heritage of the area. There are an additional nine eligible and two potentially eligible NRHP structures as indicated in Figures A.4 and Figure A.5.

Photo: *Historic Structures in Fernandina Beach (Source: WGI)*

Figure A.3: Cultural & Historic Elements Map

Figure A.4: Downtown Historic District

Figure A.5: Old Town

## E. Recreation & Open Space

Fernandina Beach's largest recreational amenity is the 1,100-acre Fort Clinch State Park located in the northern part of the City. The park provides residents with access to beaches, hiking trails, campgrounds, and historic Fort Clinch.

The City boasts nearly 8 miles of beaches with 50 public access points for residents and visitors. Two large golf courses, Fernandina Beach Golf Club and Amelia River Golf Club, are located adjacent to the municipal airport in the southern part of the City. A marina is located downtown along the Amelia River and several houses located on Egans Creek have private docks. Nassau County has a public boat ramp located north of Old Town. Fernandina Beach also possesses several city parks. Refer to Figure A.6 for locations of recreation and open space amenities in the City.

Photo: Fernandina Beach Trails (Source: ameliaisland.com)

Photo: Fernandina Beach (Source: Deremer Studios)

Figure A.6: Recreation & Open Space Map

## F. Constraints (Environment, Industrial, & Commercial)

As a barrier island community, much of the City is designated as protected wetlands and tidal marshes. Most of these wetlands are found along Egans Creek, Alligator Creek, and the Amelia River. The wetlands as well as all of Fort Clinch State Park is designated as a protected wildlife corridor. This corridor runs north/south along much of the island and restricts development.

Photos: Fernandina Beach Marina, Municipal Airport, and Wetlands (Source: Amelia Island & Fernandina Beach websites)

Beyond environmental constraints, there are constraints related to industrial, commercial and aviation activities. South 8th Street is utilized as the trucking route for the mills. Airports create their own development restrictions with clear zones and runway clearance restrictions. Refer to Figure A.7 for locations of environmental and operation constraints.

**Figure A.7: Environmental & Operational Constraints Map**

Figure A.8: Types of Flood Zones (portsmouthva.gov)

## G. FEMA Flood Hazard

Figure A.10 identifies areas of Fernandina Beach that have a 0.1% and 0.02% chance of being inundated any given year. These are also known as a 100-year and 500-year floodplain. The 100 and 500-year floodplains are identified by FEMA as Special Flood Hazard Areas (SFHAs). SFHAs present in Fernandina Beach are classified as Zone AE and Zone VE.

As shown in Figure A.9, 1,644 acres or 73% of land within the 100-year floodplain is designated conservation and recreation in both the Future Land Use Map and the LDC. This is due to most of the floodplain overlapping with wetlands and the Egans Creek Greenway. This also indicated that the City's biggest threats from flooding originate along Egans Creek and the Amelia River, not the beach area.

Fernandina Beach has strong floodplain protections in its Code of Ordinances and almost all new development requires a floodplain review.

Figure A.9: Acres of land within 100-year (AE) Floodplain

| Category 4  | 247.31                        | 25.02                         | 0.33                          | 142.39                        | 48.36                         | 9.28                          |
| Category 5  | 250.72                        | 28.86                         | 0.83                          | 177.39                        | 48.36                         | 9.28                          |

Source: Nassau County Vulnerability Assessment

H. Hurricane Storm Surge

Fernandina Beach's geographic location is susceptible to hurricane storm surge. Figure A.11 illustrates what areas of the city would be submerged for each hurricane category. Areas around Egan's Creek and Escambia are especially vulnerable. Hurricanes are expected to increase in intensity and frequency throughout the rest of the century due to warming oceans. Therefore, identifying the City's risks from these storms is crucial.

Table A.3 and Table A.4 illustrate the potential impact to property on all of Amelia Island from storm surge.

Figure A.11: Hurricane Storm Surge Map

Table A.5: Residential & Commercial Properties on Amelia Island Susceptible to Sea Level Rise

| Sea Level Rise | Residential Property          |                                | Commercial Property          |                                |
|----------------|-------------------------------|--------------------------------|------------------------------|--------------------------------|
| Indicator      | Number of Residential Parcels | Total Just Value (in Millions) | Number of Commercial Parcels | Total Just Value (in Millions) |
| 1 foot         | 584                           | 352.95                         | 17                           | 31.98                          |

Source: Nassau County Vulnerability Assessment

I. Sea Level Rise & Climate Change

The City's geographic location on a low-elevation barrier island makes the City susceptible to sea-level rise. For this reason the City has had a National Oceanic & Atmospheric Administration (NOAA) monitoring station since 1897. NOAA has developed several models that analyze sea-level rise and its consequences for coastal communities. According to the model that projects intermediate sea-level rise throughout the century, Amelia Island will lose much of its wetlands and marshes in the next few decades. Between 2040 and 2060, most of the wetlands along Egan's Creek will become permanently submerged as will the wetlands along Escambia and the Amelia River. The ocean will continue to envelop more of the island in the remainder of the century but at a much slower pace. Table A.5 and Table A.6 illustrate the value of property on all of Amelia Island threatened by sea level rise.

The Waterfront Sea Level Rise Study was done in 2019. If sea-level rise is more severe than what is predicted in the Intermediate Model projection in Figure A.12, the consequences for the City will be more severe. The High Projection Model shows the ocean rising 8.5 feet, submerging much of Fort Clinch State Park, and several blocks of Downtown, as indicated in Figure A.13.

Figure A.12: NOAA Sea-level Rise Projections for the Island

Figure A.13: Sea Level Rise Projections Map

## IV. DEMOGRAPHICS

The following summarizes demographic data from the US Census Bureau (2019). Figure A.14 provides a graphic representation of this data.

### A. Population

Fernandina Beach has an estimated 2019 population of 13,169. The city's growth rate of 15.7% from 2010-2020 is on-par with the rest of the state of Florida (14.2%) but lower than Nassau County (20.9%). The City is expected to grow by 1,459 people by 2045. The city is ethnically and racially more diverse than the rest of Nassau County with a higher percentage of their population identifying as African American, Asian, and Hispanic.

### B. Age Distribution

Fernandina Beach is home to an older population. The median age for Fernandina Beach is 54.8 and the city's percentage of population over age 65 is 12% higher than the rest of Florida and Nassau County.

Photo: Downtown Fernandina Beach (Source: Deremer Studios)

### C. Income & Property Values

Approximately 75.4% of households (HH) in Fernandina Beach are owner occupied. This closely matches the rates in Nassau County (80.0%) and is higher than Florida (65.4%). The median value of owner-occupied HH's in the city are \$333,900 which is nearly 1.5 times the median value in Nassau County (\$230,900) and more than 1.5 times the value in Florida (\$215,300).

As shown in Table A.8, the median rent prices in Fernandina Beach in 2019 were \$1,139, higher than Nassau County (\$1,046). Fernandina Beach's median HH income and poverty rates closely matched the rest of Nassau County and Florida.

### D. Employment

Fernandina Beach's 219 unemployment rate stood at 2.8%, lower than the 2019 State of Florida's unemployment rate of 3.3%.

Figure A.14: Population Demographics

#### Projected Population Growth

| Year | Population | 5-Year Change |
|------|------------|---------------|
| 2025 | 14,357     | +834          |
| 2030 | 15,085     | +728          |
| 2035 | 15,480     | +395          |
| 2040 | 15,658     | +178          |
| 2045 | 15,816     | +158          |

| Household (HH) Data                          | Fernandina Beach | Nassau County | State of Florida |
|----------------------------------------------|------------------|---------------|------------------|
| Person per HH                                | 2.14             | 2.52          | 2.65             |
| Percent of Owner-occupied Housing Units      | 75.4%            | 80.0%         | 65.4%            |
| Median Value of Owner-occupied Housing Units | \$333,900        | \$230,900     | \$215,300        |
| Median Rent                                  | \$1,139          | \$1,046       | \$1,175          |
| Median HH Income                             | \$63,942         | \$69,943      | \$55,660         |
| HH with 3 or More Vehicles                   | 13.4%            | 27.9%         | 15.6%            |

V. HOUSING SNAPSHOT

The following summarizes housing and household data from the US Census Bureau (2019).

A. Housing Unit Type

The majority of homes in Fernandina Beach are single-family detached houses (see Table A.7). The percent of housing stock that falls under this category is 10%-15% higher than the average in Nassau County and the State of Florida. The City's percentage of multifamily housing types is comparable to the rest of the County and State. The City lacks mobile homes, a housing unit type that makes up nearly a quarter (23.6%) of Nassau County's housing stock.

B. Age of Housing Stock

The housing stock of Fernandina Beach is considerably older than the rest of Nassau County and the State of Florida (see Figure A.15). Almost 45% of homes in the City were built before 1980 in comparison to Nassau County (25%) and the State of Florida (39%). The percentage of housing stock built after 2000 is below that of both the County and State. The City of Fernandina Beach boasts a large number of restored historic homes in the downtown area and surrounding neighborhoods.

C. Household Data

Fernandina Beach's housing market is more expensive than Nassau County or the State of Florida. Median home prices in the City are 45% higher than in the rest of the County and 55% higher than the state median (see Table A.8).

Rent prices are also above County and State medians. Rent prices in the City have grown more than 20% since 2000. When taking inflation into account, the median rent price in Fernandina Beach has increased \$197 per month compared to the beginning of the century. Table A.9 below illustrates the historical rent prices in the City and their 2020 dollar equivalent.

Table A.9: Rent Prices Since 2000

| Year | Rent Per Month | Inflation Adj. Rent | Percent Change |
|------|----------------|---------------------|----------------|
| 2000 | \$627          | \$942               | -              |
| 2010 | \$867          | \$1,029             | +9%            |
| 2020 | \$1,139        | \$1,139             | +11%           |

High housing costs in Fernandina Beach has resulted in an affordability predicament. Lower-income residents, service sector employees, and senior citizens are being priced out of the City.

Photo: *Housing Diversity and Character in Fernandina Beach* (Source: WGI, Google Maps, and Vintage Amelia)

## D. Missing Middle Housing

Missing middle housing is the type of housing between single-family housing and mid-rise apartment complexes. These housing types such as duplexes, quadplexes, courtyard apartments, townhouses, and live-work spaces were common in pre-1940's America and are still easily found in older, urban neighborhoods.

Missing middle housing types add density, housing choice, and affordability to a neighborhood while respecting the neighborhood's character. This is because the scale and massing of these housing types is similar to single-family houses and they blend into the existing neighborhood fabric.

Fernandina Beach has a higher percentage of missing middle housing types than Nassau County or the State of Florida (see Table A.7). Accessory dwelling units (ADUs) are approved for all areas of the city outside the historic district an mixed-use zoning districts allow for a variety of housing types. The City should aspire to retain this greater diversity of housing types as the City evolves.

These housing types can be added to the residential areas surrounding Downtown Fernandina Beach to create a more walkable and affordable environment. With careful massing and adhering to surrounding architectural aesthetics, these types can be added in a way that not only preserves but enhances the neighborhood's character and historic aesthetic.

**Figure A.16:** Missing Middle Housing (yellow) Blending in With Single-Family Homes (white) ([missingmiddlehousing.com](http://missingmiddlehousing.com))

**Figure A.17:** Missing Middle Housing Types ([missingmiddlehousing.com](http://missingmiddlehousing.com) / Optics Design Inc.)

## VI. COMMERCIAL SNAPSHOT

Fernandina Beach has a diverse inventory of commercial areas ranging from a traditional main street corridor along Centre Street to standard suburban shopping plazas. Refer to Figure A.18 for the commercial areas discussed in this Vision Plan.

### A. Downtown and Centre Street

Downtown Fernandina Beach is the commercial, civic, and social heart of the City. The area is populated with local restaurants, cafes, boutiques, and mom-and-pop stores. The area is characterized by its small, customized storefronts, walkable streetscape, historical architecture, and street grid. Centre Street acts as the commercial spine of the neighborhood

while side streets host a mix of commercial and residential properties. Pedestrian amenities such as benches, wide sidewalks, street trees, and street-lighting are abundant along Centre Street. The pedestrian environment, historical character, and inventory of unique and local shops draws both locals and tourists to downtown, creating a dynamic economic hub.

#### Opportunities

Downtown Fernandina Beach has done a good job preserving and restoring its historical buildings while ensuring new development is pedestrian oriented and of similar scale to the existing buildings. The City should continue these efforts.

Photo: *Downtown on a Friday evening (source: WGI)*

### Downtown

Downtown is full of small, unique storefronts and outdoor dining.

Photo: *Centre St. (WGI)*

## B. South 8th Street Corridor

This is a 10-block long corridor along South 8th Street bookended by Lime Street to the south and Beech Street to the north. The area is a diverse mix of restaurants, retail, service-oriented businesses, and single-family houses. Architecture ranges from historic to new builds. The corridor and surrounding area are laid-out in a traditional grid with city blocks measuring 430 ft x 200 ft. This commercial corridor is the front entrance to those traveling into Fernandina Beach from off-island, giving people their first impression of the city. The urban fabric along this corridor reads as disjointed, due to a lack of consistency in building orientation. Some structures are positioned towards the street creating a traditional main-street style, while others remain setback from the street hidden behind surface parking lot.

### Opportunities

South 8th Street has the opportunity to become a unique and dynamic mixed-use commercial corridor, as well as a strong first impression to visitors. The area between Lime Street and Center Street is already zoned for mixed use in the LDC.

The area has a diverse building stock. Recent developments have re-imagined these structures to create authentic and one-of-a-kind establishments. The projects that have creatively retrofitted existing buildings instead of new construction have become popular and well loved establishments. Mocomma Beer Company and T-Rays Burger Station are some examples of these types of development.

Photo: Types of developments along the South 8th St. Corridor  
(Source: Google Maps)

## C. 5 Points

This large suburban-style commercial area is predominately located along S.R. 200, South 14th St, and Saddler Road. It is comprised of big-box stores, stand-alone fast-food chains, strip malls, and shopping centers constructed in the 1970's and 1980's. The area is very car-oriented with large parking lots and drive-thrus. A large portion of the commercial center along S.R. 200 falls outside of Fernandina Beach city boundaries. Establishing a future vision for the area that is consistent across the commercial area will require coordination with Nassau County and how it regulates the parcels under its jurisdiction.

Photo: Example of a shopping plaza with pedestrian spaces, vernacular architecture, and lots of trees (source: WGI)

### Opportunities

As these shopping plazas and strip malls age, they will become ripe for redevelopment opportunities. A well-designed redevelopment in this area would allow the creation of a walkable, pedestrian scaled environment that more accurately reflects Fernandina's traditional development patterns and architectural styles. There is also an opportunity to remove the current sea of parking and establish new green spaces that will regrow the tree canopy lost when the original site was developed. The Gulf Coast Town Center in Ft. Myers is a good case study in how to transform a shopping plaza into an opportunity for creative placemaking.

Photo: Hotel, restaurant, and recreation development near Main Beach Park (Source: Deremer Studios)

## D. Beach Village Centers

The coastal neighborhoods along the beach are located in the eastern part of the City. Fletcher Avenue (S.R. A1A) runs parallel to the coastline and acts as the area's central thoroughfare. Three commercial nodes exist along the beach (see Figure A.18), Simmons Road to the south, Seaside Park in the center, and Main Beach to the north. The areas outside of these nodes are predominantly residential development consisting of single-family houses. These residential areas are regulated with increased side setbacks, height restrictions, and lot width restrictions to preserve ocean vistas. There are nearly 200 short-term vacation rentals located in the City along the beach as of August 2021.

### Simmons Road

This area is a blend of condominiums, hotels, restaurants, and general commercial establishments located south of the intersection of South Fletcher Avenue and Simmons Road. This area is the first non-residential area of the City visitors encounter traveling north from the rest of Amelia Island.

### Seaside Park

This is a commercial area centered on the roundabout at South Fletcher Avenue and Saddler Avenue. The retail area is more focused on tourists with several national chain and local hotels, ocean-side restaurants, and recreation/beach centered retail. Seaside Park also includes vehicular access to the beach for parking.

## Main Beach Park

This commercial area is located at the intersection of Fletcher Avenue and the eastern terminus of Atlantic Blvd (S.R. A1A). It is comprised of restaurants, hotels, and recreation/beach centered retail. Hotels servicing the area include national chains, independent lodges, and rental cottages. Main Beach Park is also home to the skate park, a putt-putt course, concessions, a boardwalk, and an open lawn for special events.

Photo: Restaurant, office, housing and recreation development near Seaside Park (source: WGI)

Photo: Downtown St. Marys (source: Google Maps)

### Opportunities

These seaside nodes should continue evolving into small village centers with shops, restaurants, hotels, and recreation amenities. These nodes support local businesses and boutique hotels instead of large chains or resorts.

An opportunity is to develop architecture and design standards to help reinforce Fernandina Beach's character as an authentic small town by focusing on local, small scale shops and hotels and keeping the buildings human scale and pedestrian friendly. The regulations could ensure buildings will be smaller in scale and organized in a compact fashion to make it easy to get around the node by foot or bicycle. This would set the City apart from other oceanside towns in the area such as Jekyll Island and resort areas on the southern end of Amelia Island, that are dominated by large-scale resorts and conforming architecture. A good example of this type of authentic, pedestrian scaled development is downtown St. Marys, Georgia.

Figure A.18: Commercial Areas Analyzed by the Vision 2045 Plan

## VII. TRANSPORTATION SNAPSHOT

Fernandina Beach today is a car-centric city. This singular focus on personal vehicles as the primary transportation option has caused the City to experience increasing traffic and parking shortages as it continues to grow. With a built environment that doesn't allow the widening of roads and land values too high to dedicate to surface parking, Fernandina needs to look beyond cars and develop a cohesive and connected multi-modal network that allows it's citizens to navigate the city foot, bike, and transit. The future multi-modal network needs to look beyond the island and look at how to connect the City to the greater Jacksonville region.

### A. Regional Connectivity

Fernandina Beach is located on a barrier island with two bridges to the mainland. It is connected to the surrounding region and nation via bus routes, rail, airport access, and port terminals (see Figure A.19). These services provide residents access to the Greater Jacksonville metro, SE Georgia, as well as national and international commercial flights and port connections. However, these regional services are limited in capacity, frequency, and convenience.

#### Bus Service

NassauTRANSIT is a public transportation service that provides bus access from Fernandina Beach to the greater Jacksonville area with stops in Yulee, Callahan, Hilliard, River City, and the Rosa Parks Terminal in downtown Jacksonville. Tickets are \$1 each way and the service runs Mondays through Fridays. NassauTRANSIT is a non-profit organization supported by the Council on Aging. The City of Fernandina Beach is not currently connected to the Jacksonville Transportation Authority (JTA) bus network.

#### Railroad

Fernandina Beach was the eastern terminus of the first Atlantic to Gulf railroad in Florida. The City had passenger rail access from 1853 to the early 1930's.

The current railroad is operated by First Coast Railroad for industrial purposes. The railroad connects the industrial and port facilities in Fernandina Beach with the Nassau Tradeplex Industrial Park, Wildlight Commercial Park, and Kingsland Business Park.

#### Airport

Fernandina Beach Municipal Airport provides regional and national access to the island via small and private aircraft. Jacksonville International Airport is located approximately 20 miles from Fernandina Beach and offers national and international commercial flights. Jacksonville International is accessible by car via S.R. 200 and Interstate 95 as well as the NassauTRANSIT bus service.

Photo: Thomas J. Shave Jr. Bridge (source: WGI)

Figure A.19: Regional Connectivity Map

#### Boat/Marine

The Port of Fernandina Beach is run by the Ocean Highway and Port Authority. The facility is the westernmost port on the Atlantic Seaboard and has the capacity to handle over 1 million tons of cargo per year. The port is connected to the mills and other industrial parks off-island via the railroad. The major markets the port services include Atlanta, Tampa, Jacksonville, New Orleans, and Houston.

B. Local Connectivity

Fernandina Beach has car-centric transportation network primarily car-centric supported by pedestrian and bicycle infrastructure and paratransit services. Survey results summarizing the public's perception of existing transportation conditions is provided in Figure A.20.

Island Hopper

The City does not have a fixed route bus or trolley service. The Island Hopper shuttle circulator operated by the Council on Aging was discontinued in 2021 due to changes in the Council's priorities and strategies.

Paratransit Program

The paratransit program was established by NassauTransit and financed through the Council on Aging to provide transit services to the elderly, disabled, economically disadvantaged, children at risk, and individuals who have no other means of transportation. The program provides door to door transportation services. Riders must qualify for the service and register with the program.

Photo: NassauTRANSIT (source: Council on Aging)

Bicycle Network

The bicycle network in Fernandina Beach is primarily comprised of bike lanes and multi-use paths. Bike lanes are located along South Fletcher Avenue (S.R. A1A) and Amelia Island Parkway. The bike lanes are identified with pavement markings and signage. However, these lanes are approximately 4 ft in width and do not meet the modern standard of 5 ft. There are concerns among the public about the safety of the bike lanes along South Fletcher Avenue. An alternative street design or alternative route is needed.

The City also boasts a multi-use paths along Jasmine Street to physically remove bicyclists from road and provide distance between them and vehicles.

Fernandina Beach has been designated a bronze level Bicycle Friendly Community since May 2013 and the designation was later expanded to include all of Amelia Island.

| Rate the following                           | Excellent | Good | Fair | Poor | Don't Know |
|----------------------------------------------|-----------|------|------|------|------------|
| Traffic flow on major streets                | 10%       | 47%  | 30%  | 14%  | 0%         |
| Ease of public parking                       | 9%        | 38%  | 34%  | 19%  | 1%         |
| Ease of travel by car in the City            | 19%       | 52%  | 21%  | 7%   | 0%         |
| Ease of travel by public transit in the City | 3%        | 12%  | 18%  | 30%  | 37%        |
| Ease of travel by bicycle in the City        | 16%       | 44%  | 22%  | 6%   | 12%        |
| Ease of walking in the City                  | 33%       | 44%  | 19%  | 3%   | 1%         |

Source: National Community Survey

## Pedestrian Connections

Fernandina Beach has a strong sidewalk network in the downtown Historic District. The area has wide sidewalks, well-marked crosswalks, street trees, lighting, and seating. However, the presence of sidewalks is inconsistent outside of downtown and the beaches.

While sidewalks exist along the 8th Street corridor, those sidewalks do not extend to the surrounding communities. Sidewalks are lacking along several streets in the Southside neighborhood and residential areas near the elementary and middle schools. A majority of the subdivision developments were designed without sidewalk access. The City conducted a sidewalk inventory in 2020. It should be a priority for capital planning projects to complete identified gaps in the network.

Concerns were raised by the public about the safety of biking and walking along busy streets where speeding is an issue. Pedestrian infrastructure can be used to make these streets safer. A crosswalk was installed on Atlantic Avenue that included pavement markings, signage with lights, and refuge island. This is a good example of installing pedestrian infrastructure along a busy road.

Finally, Fernandina Beach is home to several miles of nature and walking trails. The majority of these are located near Egan's Creek between Saddler Road and Atlantic Avenue. These are primarily used for recreation instead of mobility. The 2016 Amelia Island Bicycle and Pedestrian Focus Area Study looks at routes and connections in the city. The plan calls for a complete bicycle and pedestrian network consisting of approximately 55 miles of trails.

Figure A.21: Sidewalk Conditions (2016 Amelia Island Bicycle & Pedestrian Focus Area Study)

## C. Streets & Vehicular Connectivity

### Overview

Fernandina Beach is a city where residents primarily use their personal vehicles as their main mode of transportation. This is typical of cities located on the periphery of a major metropolitan metro (Jacksonville). According to the 2019 American Community Survey (US Census), 77.4% of Fernandina Beach workers drive alone to their place of employment while 7.0% carpooled. 8.31% worked from home and therefore did not commute.

Car ownership in Fernandina Beach is high with 98.8% having access to a personal vehicle. This is above the US average where 95.7% have access to a personal vehicle. The average household in the City has two personal vehicles.

Workers in Fernandina Beach face a shorter commute than the national average. People working within City limits face on average a 22.2 minute commute, lower than the national average of 25.5 minutes.

### Major Thoroughfares

State Road A1A is the major thoroughfare in Fernandina Beach. The road transverses the City for approximately 7.3 miles. It enters the City from the south as South Fletcher Road, turns east as Atlantic Avenue, and finally travels south out of the City as South 8th Street. The road is comprised of two travel lanes throughout City limits, before widening to a four-lane road with a turn lane as it enters county territory traveling towards Yulee and the Thomas J. Shave Jr. Bridge.

FDOT's Functional Classification System identifies all of S.R. A1A in Fernandina Beach as an *Urban Minor Arterial*. These types of roads provide traffic access and traffic circulation in lower density residential and commercial/ industrial areas. They may penetrate residential neighborhoods for only a short distance and also channel traffic from local streets to/from the arterial system.

FDOT recently developed its contextual classification system. This is used to design state facilities in context to be more appropriate with its surrounding land use characteristics. The road's contextual classification determines specific design elements and functions including speed, lane width, street tree placement, and on-street parking. The system is comprised of the following classifications;

- C1 - Natural
- C2 - Rural
- C2T - Rural Town
- C3R - Suburban Residential
- C3C - Suburban Commercial
- C4 - Urban General
- C5 - Urban Center
- C6 - Urban Core

FDOT recognizes S. 8th Street and Atlantic Avenue as a C4 roadway under the contextual classification system and South Fletcher Avenue as C3R. South 8th Street beyond City limits is recognized as a C3R roadway. Figure A.22 graphically depicts the FDOT road classifications on the island.

Figure A.22: FDOT Functional Road Classifications

# B : COMMUNITY ENGAGEMENT

## I. INTRODUCTION

### Why Now?

The development of the Vision 2045 Plan came at a pivotal time in Fernandina Beach's history. Since the adoption of the last Vision Plan in 2002, both the City and Nassau County have experienced an influx of new residents, visitors, and development. Fernandina Beach was experiencing difficulty balancing new development with environmental conservation, welcoming new citizens while preserving its small-town culture, and protecting long-term residents from gentrification. New technology and the COVID-19 pandemic revolutionized the economic landscape, leading to a rise of remote working, at-home businesses, and changed migration patterns.

### Purpose of the Vision 2045 Plan

The Vision 2045 Plan is the catalyst for Fernandina Beach to solve these issues, identify opportunities, and protect their future. The plan will be the basis for updating the City's Comprehensive Plan, Capital Improvements Plan (CIP), Land Development Code (LDC), and future planning studies. Comprehensive Plan and LDC updates will follow the adoption of the Vision 2045 Plan.

### The Project Team

The Fernandina Beach Planning Advisory Board was the driving force behind the project with the assistance of the Fernandina Beach Department of Planning & Conservation. The project team for the Vision 2045 Plan was led by consulting firm WGI, Inc. The team also included representatives from Urbanomics, Inc. and Acuity Design Group.

## II. PUBLIC ENGAGEMENT PLAN

The planning process for Vision 2045 was designed to be community-focused and driven by the public. Meaningful public engagement was incorporated from the start and continued through the vision's development. The process began on May 26, 2021, with an introduction of the project to the public during a virtual Planning Advisory Board meeting. The process continued with the launch of the Vision 2045 web page on Fernandina Beach's website, marketing through the City's various social media platforms (Facebook, Twitter, and Instagram), and a public announcement in the local newspapers, the Fernandina Beach Observer and the Fernandina News Leader.

A survey was developed and distributed through the project's official web page and direct outreach through faith-based community leaders and the Hispanic grocery stores. The survey allowed the team to reach over 1,000 Fernandina Beach citizens and gather their input and ideas for the Vision Plan. Surveys were also created for the Downtown & South 8th Street business communities and the city's school-age children. The public engagement plan also included outreach events, a public workshop, and interviews with key stakeholders and community leaders.

### A. Engagement Schedule

The Vision 2045 Public Engagement Plan officially kicked off in May of 2021 and lasted approximately 3 months. The plan included virtual presentations, digital outreach, and in-person events. The schedule of the multi-phase outreach plan is shown in Figure B.1.

**Figure B.1: Public Outreach Schedule**

## B. Kick-off Presentation

WGI introduced the Vision 2045 Plan to the public through Zoom at a May 26th Planning Advisory Board (PAB) meeting. The presentation included background information on the project, public engagement opportunities, the proposed timeline, and final deliverables. The team included a link to the new project web page to access more information.

The WGI team also performed a SWOT exercise with the PAB members to identify the City of Fernandina Beach's strengths (S), weaknesses (W), opportunities (O), and threats (T). Figure B.2 illustrates the results of the SWOT exercise.

Photo: Kick-off PowerPoint (Source: WGI)

**Figure B.2: PAB SWOT Results**

## C. Outreach

### Digital Outreach Strategy

A project web page was launched on the City of Fernandina Beach's official website as the main repository for project-related information. The web page included a description of the project, calendar of events, PowerPoint presentations, and links to multiple surveys. An email option was also provided to submit further comments or questions from the public.

The digital marketing campaign for the project included frequent postings on the City of Fernandina's social media channels. The WGI team developed a social media strategy consisting of Instagram posts, Facebook stories, tweets, hashtags, and a comprehensive schedule to coordinate among the different platforms.

Photo: Instagram Posts advertising the Project

Photo: Vision 2045 Project Webpage

### Juneteenth Event Outreach

The WGI team and representatives from the City attended the Juneteenth Homecoming Celebration on June 19th, 2021. The team hosted an information booth to inform the public about the plan and gather input from the community. The event was chosen to increase the project's outreach to Fernandina Beach's African American community. This strategy allowed the team to engage with a demographic that is often overlooked and under-represented in planning and community visioning projects.

The Vision 2045 booth also included promotional materials, handouts, and computer station set up for people to take surveys. Team members also walked around the event with iPads to engage the community, talk about the community's future vision, and collect survey data (shown in Figure B.3 on next page).

The booth also included a visioning exercise where people were invited to describe their impression of Fernandina Beach today and describe what they hope Fernandina Beach will be like in the future. Over 50 people participated in the visioning exercise and 31 people took the survey at the Juneteenth Celebration.

Photo: Juneteenth Outreach (source: WGI)

**OVER  
50  
PARTICIPANTS**

**Figure B.3: Juneteenth Outreach Results**

### What we heard ...

The team hosted a visioning exercise at the Vision 2045 booth at Juneteenth and asked participants to describe Fernandina Beach today, as well as their vision of Fernandina Beach of the future. Over 50 people partook in the exercise. Results shown to the left illustrate the common themes that arose. Full results can be found in the Appendix.

The team developed a survey asking about minority and African American experiences in Fernandina Beach. The survey was taken by 31 people, a majority Black.

### What else can the City do to support the African American and minority communities?

### Pick your top 2 actions the City should prioritize to support its minority populations.

## D. Key Stakeholder Interviews (KSIs)

The consulting team worked with the City's Planning Department to identify a list of stakeholders and community leaders to reach out and gather feedback. Most of the stakeholders were interviewed in person by the WGI team at the end of June, though some were conducted via email and Zoom.

The stakeholders interviewed ranged from government agencies, elected officials, civic groups, non-profits, major employers, religious organizations, and business associations. This diversity of stakeholders was key in obtaining a cohesive and complete understanding of Fernandina Beach.

## E. City Department Outreach

The team sent surveys to each of the City's departments to provide additional input and insight into their goals.

## F. Survey Overview

Five surveys were created and distributed via Survey123. The 45-question General Survey collected data on a wide range of topics and was available to all residents of Fernandina Beach. The four other surveys were targeted to obtain feedback from specific demographics or groups. A survey for minority and under-represented communities was developed to gather insight on the concerns of the City's African American and minority communities. A business owner survey was created to gather input from the City's entrepreneurs. An employee survey was used to identify the unique challenges for those who work in the City. This survey was open to anyone who worked in the City, including non-residents who commute for work. Lastly, a high school student and recent graduates survey was created to identify the views of Fernandina Beach's younger population.

## STAKEHOLDER OUTREACH

### City Commission

Mike Lednovich (Mayor)

Len Kreger (Vice Mayor)

Bradley Bean

Ronald Ross

David Sturges

### City Manager

### Department Heads

### County Manager

### County Commissioners

Aaron Bell

John Martin

### Historically Black Church Pastor Outreach

### Lignotech

### Rayonier Advanced Materials

### West Rock

\* The Vision 2045 group also reached out to State Senator Bean and the Port but they did not participate.

## G. General Survey

### Purpose

The General Survey was created to solicit feedback on the City's strengths, weaknesses, opportunities, threats, development patterns, housing options, public facilities, city-funded projects, resiliency, and Capital Improvement Plan priorities. The General Survey was also translated into Spanish to equally incorporate the Hispanic community and non-native English speakers. The General Survey was taken by 1,117 participants, representing approximately 9% of the City's population.

### Results

As shown in Figure B.4, the respondents of the General Survey were older than the general population, with nearly half of respondents over the age of 60. Respondents identifying as White matched the general population demographics for Fernandina Beach, however, results for those identifying as Black or Hispanic were 7.5% and 3.3% below the City's demographic. A large majority (87%) owned their home in the City. Nearly a tenth owned a business in the City (9.77%).

The majority of respondents were long-time residents who have lived in Fernandina Beach for over 6 years with more than a third of respondents living in the City for over 15 years. The respondent population skewed older with 47% over the age of 60. A large majority of respondents planned on staying in Fernandina Beach in the foreseeable future (85%) and wanted to eventually retire in the City (81%).

The small-town feel of Fernandina Beach was the main draw for living in the City. Over 600 respondents chose this as one of their top three reasons for calling the City home. Other major reasons were the beach, natural environment, sense of community, and historic character.

Figure B.4: General Survey Results - Part I

### Do you live, work, or own a business in Fernandina Beach? Choose all that apply.

### What specifically drew you to move to Fernandina Beach? Choose up to three.

If you do not plan on staying in Fernandina Beach, why are you looking to move? Check all that apply.

What do you think is the most pressing issue facing Fernandina Beach today? Choose one.

How would you rank the following? (1 - Poor | 2 - Fair | 3 - Average | 4 - Good | 5 - Very Good)

Photo: Loss of Natural Features Like Trees Was A Top Concern (source: WGI)

As depicted in Figure B.5, the change in community character is the top reason people are considering leaving Fernandina Beach along with traffic, affordability, and issues with the City government.

The most pressing issue facing the City today according to the respondents is the loss of natural features including old-growth trees, dunes, and wetlands. A close second was over-tourism with more than a quarter of the votes. Housing affordability and gentrification came in third with the rest of the issues polling under 10%.

Respondents rated the City's public facilities, services, and recreation amenities highly with all ranking over 3 out of 5 stars. The only category that received a rating below 3 stars was "Dealing with the City Government". This lower rating is consistent with feedback from stakeholders and the public regarding city regulations and the permitting process. It is also consistent with the 2019 National Community Survey.

As shown in Figure B.6, Fernandina Beach has a car-centric culture with 92% of respondents using their personal vehicle as their main mode of transportation. However, there seems to be a demand for more mobility options. 59% of respondents want to replace some of their car trips with another mode of transportation. These results contradict the Island Hopper's low ridership numbers. When asked if they ever used the circulator, 35% of respondents replied that they were unaware how to use it. This along with the result that 18% of respondents want the City to prioritize bus or trolley services for the island, points to a lack of awareness with the Island Hopper, not the concept of bus or trolley service.

There is also a desire to make it easier to navigate the City by walking or biking. Over 36% of respondents want the City to prioritize additional multi-use paths, bike lanes, and sidewalks. 40% believe that the best way for Fernandina Beach to alleviate its future parking issues is to make it easier and safer to bike and walk in the City.

Lastly, the General Survey inquired about support for paid parking. A minority of respondents (40%) supported the concept, but that number jumped to 59% when the program exempts City residents. This statistic is consistent with the 2019 National Community Survey Report that indicated majority support (55%) for a paid parking program.

**Figure B.6: General Survey Results - Part III**

**What transportation items should the City prioritize in the next 25 years with City funds? Choose one.**

**Would you support paid parking?**

\*"Yes" includes responses for Yes, Downtown Only, and Beach Only

**Would you support paid parking if City residents were exempt?**

**What is the best way for Fernandina Beach to regulate parking? Choose one.**

The General Survey asked respondents how they wanted to see the major thoroughfares of the City improved in the future. Illustrated in Figure B.7, three sections of S.R. A1A were chosen as the focal points. These sections were Atlantic Avenue from 8th Street to Fletcher Avenue, South 8th Street from Center Street to Lime Street, and South Fletcher Avenue from Atlantic Avenue to the Fernandina Beach/ County border. Survey respondents identified the burying of utilities to be a top-three priority across all three areas. Shade trees and shrubs/ flowers were identified as top streetscape elements they wanted to see along Atlantic and South 8th. Palm trees and wider sidewalks were the other major priorities for South Fletcher. The desire for wider sidewalks is consistent with complaints about bike safety and issues with the width of the existing bike lanes on the road. Half of the survey respondents identified South 8th Street as the priority streetscape for a project.

Respondents were asked to identify what types of future development, infrastructure, and City services they would like to see in the future. Figure B.8 shows that walkable, mixed-use development, and affordable housing were the development types with the strongest support. Less than 8% of respondents supported additional suburban retail, hotels, or additional development along the beach. Purchasing land for conservation was the top public investment choice with burying overhead utilities and stormwater management projects receiving top support for future infrastructure funding. Bus service and additional cultural events received strong support in the future public services category.

Lastly, the General Survey identified a list of projects that were discussed by the City or through stakeholder engagement. The public was asked to choose their top three projects they wanted to be prioritized by the City. Burying overhead utilities across the City and buying land for conservation were top priorities with majority support. Environmental resiliency projects and construction of the downtown waterfront park were next with over 30% of respondents choosing them as priority projects. These results are illustrated in Figure B.9.

Figure B.7: General Survey Results - Part IV

What improvements would you like to see on the following streets?

| Street    | Shade Trees | Palm Trees | Shrubs, Flowers | Lights | Wider Sidewalks | Benches | Public Art | Bury Utilities |
|-----------|-------------|------------|-----------------|--------|-----------------|---------|------------|----------------|
| Atlantic  | 55.9%       | 21.0%      | 29.0%           | 22.8%  | 25.8%           | 19.6%   | 14.0%      | 42.0%          |
| South 8th | 53.6%       | 27.2%      | 34.6%           | 22.8%  | 29.5%           | 11.2%   | 15.8%      | 44.0%          |
| Fletcher  | 28.3%       | 34.7%      | 24.0%           | 14.5%  | 44.4%           | 13.1%   | 9.9%       | 46.4%          |

\* Shaded cell indicates a top three priority

If the City could only finance one improvement area, which should be prioritized?

Should the City enter into a maintenance agreement with FDOT to increase landscaping along these roads?

Does Fernandina Beach provide an environment that allows seniors or disabled citizens to live independently?

What is the best strategy to make living in Fernandina Beach easier for senior citizens?

Figure B.8: General Survey Results - Part V

What type of Private Development does Fernandina Beach need more of in the future? Choose top three.

What type of infrastructure or public investment does Fernandina Beach need more of in the future? Choose top three.

What public services does Fernandina Beach need more of in the future?

What are the most important characteristics for new residential development? Choose top three.

Figure B.9: General Survey Results - Part VI

What City-funded projects or improvements do you want to see prioritized in the next 5 years? Choose top three.

| Development Type                                               | Count | Percentage |
|----------------------------------------------------------------|-------|------------|
| Bury overhead wires and storm harden utilities                 | 575   | 51.52%     |
| Purchase property for conservation                             | 563   | 50.45%     |
| Environmental resiliency projects                              | 407   | 36.47%     |
| Construct downtown waterfront                                  | 343   | 30.73%     |
| Bike infrastructure (bike lanes)                               | 305   | 27.33%     |
| Purchase property for historic or cultural preservation        | 292   | 26.16%     |
| Streetscape improvements to Atlantic, South 8th, or Fletcher   | 287   | 25.72%     |
| Incentivize construction of affordable or workforce housing    | 285   | 25.54%     |
| General streetscape improvements (trees, crosswalks, lighting) | 263   | 23.57%     |
| Construct more multi-use paths                                 | 254   | 22.76%     |
| Establish gateway or entry features for the City               | 214   | 19.18%     |
| Incentive program for septic removal                           | 145   | 12.99%     |
| Improvements to parks                                          | 142   | 12.72%     |
| Improvements to public buildings                               | 89    | 7.97%      |
| New or modernized City Hall                                    | 72    | 6.45%      |
| Improvements to community pools                                | 68    | 6.09%      |

## H. Business Owner Survey

### Purpose

WGI created a business owner survey to provide further insight into how the business climate of Fernandina Beach has been changed during the COVID-19 pandemic, and to see what type of infrastructure and support the business community was looking for from the City. The survey inquired why people chose Fernandina Beach to start their business, what obstacles they face operating in the area, and what they want to see near their business in the future. The business survey was taken by 94 participants.

### Results

As shown in Figure B.10, the survey respondents represented businesses throughout Fernandina Beach, with a large portion in the historic downtown core. However, almost 40% of the respondents indicated that their businesses were outside of the main commercial areas identified.

Most of the respondents indicated that they lived in the City before they opened their business, indicating a desire to live and work in the same place. The small-town character and tourism were also major reasons for opening businesses here. Few of the business owners identified the port, working waterfront, or airport as major reasons for establishing their business within City limits.

The major obstacle to running a business in Fernandina Beach is finding employees. Public feedback and stakeholder input have identified several reasons for the small labor pool including lack of affordable housing, lack of transportation options on the island, and a growing number of jobs being created off-island. Businesses struggling to hire employees was also noted while visiting the City, further confirming this as a main topic of concern. Increasing rent prices and government regulations such as outdoor seating, sign regulations, and inspections rounded out the top three concerns.

A quarter of respondents identified simplification of the permit process as the City action or policy that would have the biggest benefit to their business. Investment in affordable housing and additional parking ranked second and third. This could be due to the high number of workers who can not afford to live in Fernandina Beach and commute to the island.

Finally, the survey asked what kinds of amenities, investments, and developments they wanted to see around their business. Pedestrian spaces, plazas, and public seating areas were the top choices. The number of businesses that wanted to see these improvements exceeded the number of businesses currently located downtown. This means there is a desire for more pedestrian-oriented infrastructure beyond the downtown city center.

Figure B.10: Business Survey Results

### What attracted you to open your business in Fernandina Beach? Choose all that apply.

### Which of the following City actions would be the biggest benefit to your business? Choose one.

### What do you want to see more of near your business? Choose one.

## I. Employee Survey

### Purpose

An employee survey was created to better understand the issues and concerns of those who work in the City of Fernandina Beach. This survey was open to both people who live in the City and those who live elsewhere and commute into the City for work. The survey asked participants about affordability of living near their place of employment, transportation issues, childcare access, and what steps the City could take to improve their experience of working in Fernandina Beach. 124 people participated in the employee survey.

### Results

Illustrated in Figure B.11, the majority of respondents do not live in Fernandina Beach and commute into the City for work. 38% of the respondents come from off-island. Almost half of the respondents did not feel like they could afford to live in the City with their current jobs and 40% did not see opportunities for upward mobility working in Fernandina Beach. Over a quarter (27%) of respondents were working multiple jobs or attending classes.

Access to childcare and healthcare were identified by 19% of the respondents as challenges they face working in the area. Access to affordable housing near their work and transportation to and from their place of employment were identified as challenges working in the City.

When asked what was the most impactful thing the City could do to make working in Fernandina Beach easier, 44% identified affordable housing as their top choice. This choice had more than double the support as the second top option "other" which is not a monolithic category but a conglomerate of different opinions.

Figure B.11: Employee Survey Results

## J. High School Students & Graduates

### Purpose

A high school student and recent graduate survey was developed to increase outreach to young people in the community. This gave the team insight on how young people view the City and if they were looking to remain in the City after graduation. The survey was used to get a sense of the City's retention of young people and identify reasons young people were looking to stay or leave. The high school and recent graduates survey was taken by 30 participants.

### Results

As shown in Figure B.12, the vast majority of students (77%) are planning on leaving Fernandina Beach after graduation. Reasons ranged from job opportunities to leaving for college. Only 13% plan on staying in the City. A major reason for this exodus is young people do not see employment or education opportunities in the City and are looking at the greater Jacksonville metro for those opportunities. A majority of respondents also identified the cost of living as a major barrier to staying. Less than a quarter of respondents identified a desire to move back to Fernandina Beach later in adulthood.

A large majority of respondents would be more willing to stay in the City if there were more job opportunities in their fields and if they could afford a home.

Figure B.12: High School & Recent Graduates Survey Results

What reasons do you have for leaving Fernandina Beach? Choose all that apply.

What would increase your chances of staying or returning to Fernandina Beach as an adult? Choose all that apply

### K. Planning Workshop

The WGI team along with members of the City's Planning department hosted an interactive planning workshop at Central Park on July 23rd from 5PM-6PM. This workshop, branded as "Planning in the Park", was run open-house style to provide a casual and open environment for people to participate. This strategy provided a flexible schedule for residents who could not dedicate two full hours for a traditional presentation. Instead, this allowed for a more equitable experience by preventing the most vocal of participants from dominating the conversations.

The workshop was broken up into multiple stations that focused on different aspects of the community and Vision Plan. The station themes are shown in Figure B.13

Figure B.13: Workshop Stations

- 1 Welcome Station
- 2 Resiliency Station
- 3 Housing Station
- 4 Development Station
- 5 Transportation Station

Photo: Participant spending their "tax money" on CIP projects. (source: WGI)

Photo: Workshop participants at the Housing, Development, and Transportation Stations (source: WGI)

Sustainability & Resiliency Station

The second station was dedicated to sustainability and resiliency. The station included two boards where participants were asked to vote on different questions. The first question asked how high of a priority sustainability and resiliency projects should be in compared to other City projects. Shown in Figure B.16, two thirds of respondents identified sustainability and resiliency as a high priority for Fernandina Beach.

Another board asked participants what type of projects, programs, and actions they supported the City taking, to better address resiliency and sustainability. People were encouraged to vote for all options they supported. Illustrated in Table B.2, the top three options were buying land for conservation, limiting infill of wetlands, and developing a septic tank removal program.

Figure B.16: Resiliency Priority

Table B.2: Public Support for Resiliency Projects

| Project or Policy                                                                                                                                 | Vote |
|---------------------------------------------------------------------------------------------------------------------------------------------------|------|
| Buy land for conservation                                                                                                                         | 45   |
| Prohibit infill of wetlands                                                                                                                       | 26   |
| Prohibit septic tanks, create incentive program to remove existing septic tanks                                                                   | 23   |
| Require on-site collection and filtration of stormwater for new development                                                                       | 20   |
| Redesign public streets to have green features such as permeable pavers or rain gardens.                                                          | 18   |
| Prohibit non-recreation development in areas susceptible to storm surge from a Category 1 hurricane.                                              | 18   |
| Reduce impervious surface ratios for new development (less impervious surface)                                                                    | 18   |
| Hire a dedicated staff person to oversee resiliency projects, strategies, and research funding or grant opportunities. (Chief Resiliency Officer) | 14   |
| Continue prioritizing city funds and grants for stormwater mitigation projects                                                                    | 14   |
| Join a multi-jurisdictional resiliency group with other cities in the Jacksonville metro                                                          | 14   |
| Renovate public facilities to be more energy-efficient                                                                                            | 10   |
| I do not support the City spending money on resiliency projects                                                                                   | 8    |

Development Station

Once participants were finished at the Sustainability & Resiliency Station, they moved onto the Development Station. This station included 5 boards asking about the character and types of development the public wanted to see throughout the City.

Participants were asked to vote for all types of development the City should encourage in the next 25 years. At the end of the workshop, the most popular options were

- Walkable, mixed-use;
- Pocket Neighborhoods; and
- No development.

The least popular options were suburban commercial developments, office, and hotels. The final results are found below in Table B.3.

Table B.3: Future Development Types Results

What kind of development would you like to see more of in the next 25 years? Choose all that apply.

| Development Type           | Vote |
|----------------------------|------|
| Walkable, mixed-use        | 26   |
| Pocket neighborhoods       | 26   |
| None                       | 26   |
| Medium-density residential | 12   |
| Low-density residential    | 11   |
| Port/industrial            | 5    |
| Suburban commercial        | 1    |
| Hotels                     | 1    |
| Office buildings           | 0    |

The Development Station also identified four areas of the City and asked participants to vote on how they would like to see these areas develop in the next 25 years. These areas included S. 8th Street, 14th Street, Saddler Road, and the beaches. Results are shown in Figure B.17.

The current Comprehensive Plan and LDC encourages S. 8th Street to develop into a mixed-use corridor. To support that vision, participants showed support for mixed-use developments oriented towards the street, widening sidewalks, increasing landscaping, and establishing public plazas or gathering spaces. No participants preferred 8th Street to remain the same as it does now.

14th Street is currently a corridor comprised of a disjointed mix of uses and identities including single family houses, suburban commercial, multi-family residential, and small offices. When asked what type of uses and developments would be most appropriate for this area the most popular option was mixed-use. The second most popular option was no development with few people supporting stand-alone residential or office developments. No participants supported large-scale commercial development along 14th Street.

Present-day Saddle Road has an eclectic mix of commercial developments between S. 8th Street and Fletcher Avenue including big-box stores, shopping plazas, hotels, fast-food restaurants, and a few free-standing office buildings. The road currently operates as a 4-lane highway to reach the beaches. Sidewalks are present on both sides but pedestrian activity is limited to the areas between the hotels and Seaside Park. Participants showed strong support for making the area a mixed-use corridor with nearly 60% of the votes. The second most popular option was no development with less than half of the votes. Few participants wanted to continue the development pattern of shopping plazas and big-box stores.

In the last area, participants were asked to provide input on the type of development they preferred at the Main and Seaside Beach areas. As shown in Figure B.17, the public indicated through their votes that the areas along the coastline were nearing capacity and didn't want to see additional development. If development were to continue in these areas, it is preferred that it be limited to a small area around Main and Seaside park. These areas should be maintained as village centers with small shops, local restaurants, and other pedestrian scaled development. There was little to no support for large-scale commercial, residential, or hotel/resort development along the beach. Recreation was another popular choice.

**Figure B.17: Streetscape Elements Results**

**What kind of development or improvements would you like to see along the following streets?  
Choose all that apply.**

## Housing Station

Next up was the Housing Station. First, participants were asked what type of housing is appropriate for Fernandina Beach. Single-family homes were the overwhelmingly popular choice with duplexes coming in second. Townhouses, small apartment buildings, and carriage houses received some support while large apartment complexes were the most unpopular choice receiving only one vote.

Participants were asked if they would support a development with increased density if the structure blended in with the characteristics and aesthetics of the neighborhood. Three-quarter of respondents (74%) voted no.

**Figure B.18: Housing Station Results**

**Which of the following housing types are appropriate for Fernandina Beach?**

| Development Type          | Vote |
|---------------------------|------|
| Single-Family House       | 40   |
| Duplex                    | 23   |
| Townhouse                 | 15   |
| Small Apartment Building  | 15   |
| Carriage House            | 13   |
| Medium Apartment Building | 8    |
| Quadplex                  | 4    |
| Large Apartment Complex   | 1    |

**Would you support denser housing if the building visually blended into the existing community?**

Workshop participants identified the need for new developments to design their projects around the site's natural elements as the most important factor in new residential development. This is consistent with the loss of natural features ranking highly as a concern.

The last part of the Housing Station asked participants to choose the best strategy the City could take to increase the number of affordable housing options in Fernandina Beach. The results were relatively split with no overwhelming favorite. Constructing more public housing units took the top spot while the other choices received approximately the same amount of support among each other. Final results of the Housing Station are shown in Figure B.18.

**What is the most important factor in new residential development?**

**What is the best strategy to get more affordable housing options in the City?**

## Transportation Station

The final station was dedicated to transportation and mobility. This station was used to gain insight on how the public thinks people should navigate Fernandina Beach in the future.

A major concern identified by stakeholders and the public was the lack of available parking, especially in the downtown area and near the beaches. Participants were asked to identify what they believed was the best way to reduce the demand for parking in these areas and across the City (see Figure B.19). More than half of the respondents supported the idea of making biking and walking safer. This would allow residents to feel more comfortable navigating their city without their personal vehicles.

Another issue brought up was the increase of traffic on the island. Due to the historic nature of much of Fernandina Beach, most roads cannot be widened for increased capacity. Therefore, people must get around in a more efficient manner. As illustrated in Figure B.19, over a third of participants identified that new development or redevelopment should be walkable in nature, allowing residents to get around without a car. The use of an island circulator or trolley system also polled high, with nearly a third of participants.

The results from the Transportation Station shown in Figure B.19 combined with the survey results show there is a public desire to make Fernandina Beach a more walkable and bikeable city and offer more modes of mobility across the island.

**Figure B.19: Transportation Station Results**

**How should the City reduce parking demand in the future? Choose all that apply.**

**How should the City reduce vehicular traffic in the future? Choose all that apply.**

## I. ENVIRONMENTAL SUSTAINABILITY & RESILIENCY

The following section identifies resources and case studies to help implement the Vision Plan's goals for Theme 1: Environmental Sustainability & Resiliency.

### A. Protect & Increase the Tree Canopy

#### Toronto Urban Forestry Master Plan

As the importance of urban trees has become more apparent in recent years, several cities have developed comprehensive and detailed urban forestry master plans that can be used by Fernandina Beach as a guide. The Toronto Urban Forestry program is a good case study that comprehensively looks at the challenges urban trees face in growing and urbanizing areas and identifies strategies to mitigate those challenges. One innovative approach the Toronto plan utilizes is considering potential canopy growth of a parcel by land usage. This gives the city a broad overview of potential planting areas at a city-wide level. The plan also identifies the unique challenges trees experience in urban areas including forest fragmentation, soil quality and volume, soil compaction, air quality, and stormwater quantity and quality. Lastly, the plan created a mortality study for new street trees to better pinpoint the reasons why some newly planted street trees do not survive their first few years.

<https://www.toronto.ca/data/parks/pdf/trees/sustaining-expanding-urban-forest-management-plan.pdf>

#### Shopping Center Redevelopment

Redevelopment offers another opportunity to increase tree canopy, especially in areas that do not have a lot of existing trees. For example, the large shopping plazas in the 5 Points area could be redeveloped in the next 25 years. Traditional suburban shopping centers like Amelia Plaza, Island Walk, and Saddler Square have been falling out of fashion nationwide. Many of these types of developments have been retrofitted to include pedestrian areas, greenspace, and an abundance of trees. A good case study is the Gulf Coast Town Center near Ft. Myers, FL. This development is populated with big-box retail stores like Amelia Plaza or Island Walk but it is designed in a more pedestrian friendly way. The additions of greenspace, wide sidewalks, and landscape features allows the development to support a small forest of trees. This project shows that you can support a similar retail mix and design it in a way that maximizes its contribution to the City's urban tree canopy.

<https://www.gulfcoasttowncenter.com/>

## B. Increase Acreage of Land Dedicated to Recreation & Conservation

### CLAM Program - Nassau County

A good case study example of a CLAM Program is Nassau County's Conservation Land Acquisition & Management (CLAM) program. The program was developed by the county with the assistance of the North Florida Land Trust to "preserve and conserve the county's natural, historic, and working lands resources by identifying, ranking, and assessing conservation lands for acquisition and management." CLAM utilizes a GIS-based map and database to identify, analyze, and rank parcels being considered for acquisition. A similar program is currently being considered by the City's Planning & Conservation Department. Completion and implementation of this program is critical to maximizing the efficiency of the City's land conservation strategy.

<https://maps.nassauflpa.com/portal/apps/opstdashboard/index.html#/8749e68a9bbf471cb2d5ff3bf61d25c8>

## C. Remove All Septic Tank

### Septic Tank Removal Program - Jacksonville

Several cities in Florida have undertaken septic tank removal programs to address ground pollution, blue-green algae blooms, red tide, and other environmental and health issues in the last few years. Two examples are Jacksonville and Naples. These programs offer a guide on how to transfer residents from a septic tank to a City sewer system. They also offer insight into some of the challenges faced by the City's undertaking this type of program. For example, Naples has received public push back from the program due to a lack in communication with the public. This resulted in complaints about residents unable to access their homes during sewer installation, noise complaints from construction, and fears about access for emergency vehicles. Lessons learned from these programs gives Fernandina Beach insight on how to better execute its strategy.

[https://www.jea.com/in\\_our\\_community/construction\\_projects/septic\\_tank\\_phase\\_out/](https://www.jea.com/in_our_community/construction_projects/septic_tank_phase_out/)

## D. Further Improve Protections of Wetlands & Coastal Areas

### Green Infrastructure Adaptation Plan - Melbourne, FL

A highly effective way to protect surface water quality is to utilize low-impact development strategies to collect and filter stormwater runoff before it reaches rivers, streams, ponds, and other surface water features. Cities have begun using low-impact development strategies to control stormwater runoff. The Town of Melbourne Beach was awarded a grant from FDEP to assist in the preparation for comprehensive plan amendments to the Coastal Management Element for the Melbourne Beach Comprehensive Plan and the Evaluation and Appraisal Report (EAR). This grant lead to the creation of their Green Infrastructure Adaption Plan. This plan contains recommendations for potential projects, project locations, renderings, strategies, potential constraints, and next steps that the Town can implement.

<http://ftp.ecfrpc.org/Projects/Melbourne%20Beach%20Green%20Infrastructure%20Adaptation%20Plan.pdf>

## E. Increase City's Resiliency to Climate Change, Storm Surge, & Sea Level Rise

### Adaptation Action Areas

An Adaption Action Area is "a designation in the coastal management element of a local government's comprehensive plan which identifies one or more areas that experience coastal flooding due to extreme high tides and storm surge, and that are vulnerable to the related impacts of sea-levels for the purpose of prioritizing funding for infrastructure needs and adaption planning". An Adaption Area Framework is used to help develop and frame recommendations.

[https://floridadep.gov/sites/default/files/CRI\\_AAA\\_Planning\\_Guidebook\\_for\\_Florida%27s\\_Local\\_Government.pdf](https://floridadep.gov/sites/default/files/CRI_AAA_Planning_Guidebook_for_Florida%27s_Local_Government.pdf)

### Special Assessment Areas

A special assessment is an additional property tax assessed by the local government to pay for their property and neighborhood projects. The tax goes toward a specific geographic region known as a special assessment district, and the property owners in that area are the only ones who must pay. These can be levied in Fernandina Beach to pay for flooding and storm surge protection projects along Egans Creek, Escambia, and the Beach areas.

[http://www.leg.state.fl.us/statutes/index.cfm?App\\_mode=Display\\_Statute&Search\\_String=&URL=0100-0199/0197/Sections/0197.363.html](http://www.leg.state.fl.us/statutes/index.cfm?App_mode=Display_Statute&Search_String=&URL=0100-0199/0197/Sections/0197.363.html)

## II. PRESERVATION OF CHARACTER

The following section identifies resources and case studies to help implement the Vision Plan's goals for Theme 2: Preservation of Character.

### A. Ensure Preservation & Upkeep of Historic Assets

#### Cemetery Upkeep - Savannah

Restoration and repair of the Bosque Bello Cemetery is critical in preventing the property from deteriorating beyond repair. A major obstacle restoring the cemetery is the legal jurisdiction of who is responsible for headstone and enclosure repairs. Currently, owners of the burial plot are responsible for upkeep, preventing the cemetery from restoring headstones in the older sections of the cemetery when plot owners cannot be found and contacted. A strategy that can circumnavigate this impasse is to adopt a 50–70-year rule that would allow the cemetery to repair headstones and enclosures after the allocated timeframe and if no owners can be contacted or found after an exhaustive search. The City of Savannah's Code of Ordinances (Chapter 3 Section 4-3020) provides a good case study on which to base a future City ordinance.

<http://online.encodeplus.com/regs/savannah-ga/doc-viewer.aspx?secid=1052#secid-1052>

### B. Preserve the Existing Building Stock

#### Historic Preservation Standards - Cincinnati

Several cities throughout the United States have bolstered their historic preservation guidelines in their municipal codes. A good case study relevant to Fernandina Beach is the City of Cincinnati, OH. The City contains Over-the-Rhine, one of the largest intact historic neighborhoods in the county. The City amended its municipal code to be more favorable to historic preservation and hold building owners more accountable. Elements of the municipal code (Chapter 1435 – Historic Preservation) that have been implemented include

- a Certificate of Appropriateness must be obtained before a demolition permit can be issued;
- minor repairs and maintenance that do not alter the appearance of the building do not need to be reviewed. This is to prevent the deterioration of existing structures; and
- owners must demonstrate that the existing structure cannot be renovated or reused for any use or reasonable economic return.

The code changes helped preserve the Over-the-Rhine neighborhood and strict urban design and architectural guidelines have established it as a premier historic neighborhood. Similar code language in the Fernandina Beach LDC could incentivize developers to adaptively reuse existing structures for their development by making demolition requirements more stringent even for non-designated structures. The strategy of preserving structures beyond the Historic District and those that are designated historic align with Objective 11.08 of the Comprehensive Plan.

[https://library.municode.com/oh/cincinnati/codes/code\\_of\\_ordinances?nodeId=TIXIZOCOCI\\_CH1435HIPR](https://library.municode.com/oh/cincinnati/codes/code_of_ordinances?nodeId=TIXIZOCOCI_CH1435HIPR)

### C. Ensure New Buildings Are in Line With the Community's Character

#### Hybrid Form Based Code

A major problem with developing buildings and neighborhoods that have the same scale, character, and charm of historic districts is that Euclidean based codes do not allow for their development. Euclidean codes are more focused on a building's use and parking ratio than form, architecture, and context. The best way to circumnavigate these restrictions is to adopt a form-based code. These codes allow for buildings that better align and complement the urban form of older neighborhoods. According to Smart Growth America, *"form-based code is a land development regulation that fosters predictable built results and a high-quality public realm by using physical form (rather than separation of uses) as the organizing principle for the code. Form-based codes address the relationship between building facades and the public realm, the form and mass of buildings in relation to one another, and the scale and types of streets and blocks."*

There are several benefits to adopting a form-based code. Daniel Harrings of Strong Towns identifies 6 main benefits.

- 1. Encourages Revitalization:** Form-based codes promote the reuse of existing structure in creative ways without having to worry about extensive use restrictions. They also are beneficial to local and small-scale developers by creating an approval process that is predictable and streamlined.
- 2. Promotes Affordable Housing:** Form-based codes allow for new housing that matches the look and feel of a place, but creates flexibility for housing options like cottage courts, accessory dwelling units, pocket neighborhoods, and other various homes that meet the needs of lower-income and senior residents.
- 3. Helps Small Businesses:** Form-based codes de-emphasize the use of a building and focus on how buildings fit into their surrounding context. This strategy allows for the establishment of corner stores, live-work spaces, and neighborhood coffee shops not usually allowed in traditional Euclidian zoning. Form-based codes also allow for commercial spaces with smaller footprints that are more attractive to local businesses, whereas Euclidian zoning encourages large, single-use structures favored by national chains.
- 4. Promotes Walkability:** Good walkable neighborhoods apply the principle of the 15-minute city where a person can access all their basic services within a 15-minute commute from their home. Form-based codes make it easier to achieve these neighborhoods by allowing for a mix of businesses, services, restaurants, and cafes in the same area.

**5. Preserve a Sense of Place:** One of the most enjoyable aspects of a historic neighborhood is its strong sense of place, the feeling that you are in a unique and special area. Many of the most cherished historic areas in America like historic Savannah, Annapolis, and coastal towns in New England are characterized by their architectural fabric comprised of a diversity of buildings unified by a cohesive look or style. Form-based codes allow for harmonious and cohesive neighborhoods while allowing for a diversity of uses and building types.

**6. Stop Regulating the Wrong Things:** Form-based codes regulate how the everyday citizen will interact with a building and how to make that interaction pleasant convenient, and enjoyable.

<https://www.strongtowns.org/journal/2020/6/8/6-reasons-your-city-needs-a-form-based-code>

### Reverse Engineering Architectural Standards - Coral Gables

A good case study for the development of form-based code regulations is Coral Gables, Florida. The City realized that many of the historic buildings loved by the community could not legally be constructed under Euclidean zoning standards. This led to the reverse engineering of their development code. They looked at historic buildings and neighborhoods that the city wanted to emulate and determined what regulations would allow that type of structure to be built. The end result was a form-based code that encouraged development that was more in line with the historic vision for the city and complimented the old urban form of the community.

<https://codehub.gridics.com/us/fl/coral-gables>

### Best Practice Manuals - Coral Gables

Coral Gables also developed best practices guidebooks to help developers and architects better design their buildings or additions to the character and charm of the community. These books identified existing buildings in the City that were considered exemplary examples of what new construction should look like, and identified architectural features and massing of the structure. One of the most beneficial and effective elements of the guidebooks is that they include dimensions of architectural features. These help architects design new buildings that are in proportion and in the correct scale of existing neighborhood buildings. Lastly, to encourage architects and developers to adhere to the best practices guidebooks, the City offers a design bonus to developments that strictly adhere to the document's design principles (Sec. 5-200).

<https://www.coralgables.com/departments/DevelopmentServices/medbonus>

### Neighborhood Conservation Districts

Preserving the character of a City is challenging. Many Cities attempt to regulate new development to match the character of the City as a whole. However, a City is made up of many different neighborhoods and each has its own unique character. For example, Old Town has a different character than the Southside Neighborhood. Figuring out how to tailor development requirements to these specific neighborhoods or character areas can be challenging.

A good way to solve this predicament is to establish Neighborhood Conservation Districts (NDCs) . These act as an overlay that allows communities to better tailor development requirements to their neighborhood's character. The National Trust for Historic Preservation compiled an Administrative and practices guidebook for the City of Detroit where they explained that *"The uses of an NCD include protecting against teardowns and "mansionization," stopping inappropriate demolition, or regulating neighborhood change by requiring architectural standards, square footage requirements, lot size, or tree conservation. In this way, the neighborhood planning model is well suited to help steer neighborhood change ex ante in the direction of desired outcomes, such as ensuring affordable housing or compatibility of uses when older areas are faced with intensive development pressures."*

[Neighborhood Conservation Districts](#)

### Pattern Book - Village of El Portal

Development requirements should be predictable and easily understood by the community. A great way to make these requirements more digestible for the general public is to make them graphic and provide examples. The Village of El Portal used this strategy to develop the Pattern Book. This book acts as the design guidelines for the small village. It illustrates the appropriate architectural styles for the village, identifies and explains basic architectural features, lists appropriate building materials, illustrates proper building massing and orientation, and provides guidance on landscape materials and design. The book is 41 pages, most of them pictures, and easily legible to the average citizen. The Pattern Book also helps board members who review these designs to provide better feedback to an applicant. A similar document could be used to articulate the specific design standards for each NDC in Fernandina Beach. This would make each area's development standards easily understandable to builders, architects, and neighborhood residents.

<https://elportal.plusurbia.com/patternbook/>

## D. Reinforce Community's Social Networks & Small Town Character

### Open Space Requirements - Dublin, OH

Form-based codes are the best way to allow this type of redevelopment. A good case study found in Dublin, Ohio. The suburban city adopted a form-based code for its historic downtown and surrounding area to encourage walkable, human-scale development. An important aspect of this code was the inclusion of public space requirements that mandate redevelopment projects including well designed public plazas, walkways, and seating areas to encourage social interaction amongst residents. The code was successful in initiating this kind of development.

<https://dublinohiousa.gov/dev/dev/wp-content/uploads/2019/05/BSD-Code-Amended-4-26-21.pdf>

(Page 80)

### Village Commons Plaza - West Palm Beach

Public gathering spaces can be included in more suburban style developments as well. The Village Commons Shopping Center in West Palm Beach is a typical suburban commercial development. However, what differentiates it from other strip malls is the inclusion of a well-designed public gathering space. The plaza at the Village commons contains seating, trees, landscaping, and a fountain. Restaurants in the shopping center have their dining patios spill over into the plaza and local musicians use it as a performance space in the evenings.

<https://www.google.com/maps/@26.7135952,-80.1016036,111m/data=!3m1!1e3>

## III. LIVABILITY

The following section identifies resources and case studies to help implement the Vision Plan's goals for Theme 3: Livability.

### A. Better Balance Tourism With the Needs of Residents

#### High Tourism Impact Tax

In addition to any other tourist development tax imposed, a county with a high tourism impact may levy an additional 1% tax on the total amount charged for transient rental transactions. The proceeds must be used according to s. 125.0104(5), F.S. The provisions in s. 125.0104(4)(a)-(d), F.S., regarding the preparation of the county tourist development plan do not apply to this tax.

[http://www.leg.state.fl.us/statutes/index.cfm?App\\_mode=Display\\_Statute&URL=0100-0199/0125/Sections/0125.0104.html](http://www.leg.state.fl.us/statutes/index.cfm?App_mode=Display_Statute&URL=0100-0199/0125/Sections/0125.0104.html)

#### Paid Parking Program - Cocoa Beach

The use of paid parking programs to create revenue from visitors and is a mechanism to control parking management. Some cities have developed tiered payment structures that allow residents of the city to pay less for a parking permit than visitors. This strategy allows locals to easily enjoy the amenities of their community while maximizing revenue streams from tourists. Cocoa Beach is an example of this strategy. The City allows its residents to purchase parking permits for \$20 a year while charging out of town guests \$75. This strategy could be utilized by

Fernandina Beach to develop a program where city residents can obtain a parking permit for a small fee or for free and institute an hourly paid parking program for all public spaces. Tourists and out of town visitors would have to feed the meter while city residents who obtain a permit would be exempt from all parking fees. Revenue from the parking program can be used to fund other programs, projects, or initiatives for the City.

<https://www.cityofcocoabeach.com/541/Parking-Permits>

| City               | Public Parking Revenues |
|--------------------|-------------------------|
| Jacksonville Beach | \$200,249               |
| St. Augustine      | \$2,222,000             |
| New Smyrna Beach   | \$1,000,000             |
| Cocoa Beach        | \$2,385,000             |

Source: FY20-21 City Budgets

### B. Improve Living Conditions of Seniors

#### CAPABLE Program

Community Aging in Place—Advancing Better Living for Elders (CAPABLE) is a program offered through the Johns Hopkins School of Nursing for low-income seniors to safely age in place. The approach teams a nurse, an occupational therapist, and a handy worker to address both the home environment and uses the strengths of the older adults themselves to improve safety and independence.

[https://nursing.jhu.edu/faculty\\_research/research/projects/capable/](https://nursing.jhu.edu/faculty_research/research/projects/capable/)

## C. Expand Affordable Housing Opportunities

### Affordable Housing Bonus - St. Johns County

The Workforce/Affordable Housing Density Bonus accommodates provisions for the Development of housing affordable to very low, low, and moderate income households in fulfillment of policies of the Future Land Use and Housing Elements of the St. Johns County Comprehensive Plan. For purposes of this Section, Workforce/Affordable Housing is defined as housing for which monthly rents or monthly mortgage payments (including taxes and insurance) do not exceed thirty percent (30%) of gross household annual income.

<http://www.co.st-johns.fl.us/longrangeplanning/media/LDC/ArticleV.pdf> (Sec 5.07 pg 44)

## D. Maintain Socio-Economic Diversity

N/A

## IV. FUTURE READY INFRASTRUCTURE, UTILITIES, & PUBLIC FACILITIES

The following section identifies resources and case studies to help implement the Vision Plan's goals for Theme 4: Future Ready Infrastructure, Utilities, & Public Facilities.

Future ready means that the City's infrastructure, utilities, and public facilities will meet their current needs, while building a flexible, reliable, scalable to handle future requirements, trends, and technology

### A. Establish a Resilient Smart Grid, Electric Vehicle Charging Network, & Improve Broadband Access

#### Dig Once Policy

A strategy to increase access to broadband that has been adapted in California, Indiana, and North Carolina is the “dig once policy.” This means that during the construction or repair of a road or an underground utility, agencies can leverage rights-of-way to simultaneously install conduit or run fiber at a lower cost. This strategy allows for minimal construction disruption while reducing the cost of installing broadband infrastructure. Fernandina Beach should coordinate streetscape projects, water/ sewer line upgrades, broadband installation, and the burying of overhead power lines so that all of these elements can be accomplished at one time for a more affordable price than undergoing these projects separately.

<https://www.ncbroadband.gov/technical-assistance/playbook/policy-broadband/dig-once-policies>

#### Electric Vehicle Compatible Building Code

The first strategy is to ensure that all new buildings are compatible with electric vehicle charging installation and operation by updating the building code. This makes the transition to an electric vehicle easier and more appealing as well as making a property more appealing for those who already own an electric vehicle. Good case studies of cities that have adopted electric vehicle ready building codes include Atlanta, Georgia (Ordinance 17-0-1654) and Boulder, Colorado (Section K111).

[https://library.municode.com/ga/atlanta/ordinances/code\\_of\\_ordinances?nodeId=869232](https://library.municode.com/ga/atlanta/ordinances/code_of_ordinances?nodeId=869232)

<https://assets.bouldercounty.org/wp-content/uploads/2017/03/building-code-2015.pdf> (pg 20)

#### Electric Vehicle Task Force - San Jose

Another strategy is to streamline the permitting process for electric vehicle charging infrastructure. A recommended strategy is to create a task force to examine potential roadblocks in the permitting process and recommend improves to expedite the process. San Jose, California is an example of a municipality that used this strategy, and the results were codified in Chapter 17.88(4) of the LDC.

[https://library.municode.com/ca/san\\_jose/codes/code\\_of\\_ordinances?nodeId=TIT17BUCO\\_CH17.88ELVECHSTEXBUPEPRELVECHST](https://library.municode.com/ca/san_jose/codes/code_of_ordinances?nodeId=TIT17BUCO_CH17.88ELVECHSTEXBUPEPRELVECHST)

#### Electric Vehicle Charging Network Partnership

An electrical vehicle charging network can be built and expanded through partnerships with local utilities. Utility companies can install, own, and operate public electric vehicle charging stations. Utility companies can also enter into special contracts with apartment complexes where participating residents get access to a charging station in exchange for an extra fee on their electric bill.

#### Climate Mayors Electric Vehicle Purchasing Collaborative

The Climate Mayors Electric Vehicle Purchasing Collaborative is a network of over 400 municipalities throughout the United States that leverage the buying power of Climate Mayors to reduce the costs of electric vehicles and installing charging infrastructure. The collaborative also has additional resources including training, best practices, educational resources, and data analysis support.

<https://climatemayors.org/ev-purchasing-collaborative/>

### B. Incorporating Sustainable Future Proofing (SFP) Design Principles into Public Facilities

#### Principles of Future Proofing

Future proofing is the process of anticipating the future and developing methods of minimizing the negative impacts while taking advantage of positives. The Principles of Future Proofing were developed as a broader definition of resiliency. They include concepts of resilience, sustainable design, and life-cycle analysis, as well as addressing climate change and cultural heritage preservation.

<http://principlesoffutureproofing.com/10-principles/>

## V. MOBILITY & TRANSPORTATION

The following section identifies resources and case studies to help implement the Vision Plan's goals for Theme 5: Mobility & Transportation.

### A. Complete Sidewalk & Bike Networks

#### Vision Zero

Vision Zero is a strategic shift in traditional traffic management and infrastructure design in two major ways.

1. Vision Zero recognizes that people will sometimes make mistakes, so the road system and related policies should be designed to ensure those inevitable mistakes do not result in severe injuries or fatalities. This means that system designers and policymakers are expected to improve the roadway environment, policies (such as speed management), and other related systems to lessen the severity of crashes.
2. Vision Zero is a multidisciplinary approach, bringing together diverse and necessary stakeholders to address this complex problem. In the past, meaningful, cross-disciplinary collaboration among local traffic planners and engineers, policymakers, and public health professionals has not been the norm. Vision Zero acknowledges that many factors contribute to safe mobility -- including roadway design, speeds, behaviors, technology, and policies -- and sets clear goals to achieve the shared goal of zero fatalities and severe injuries.

To become a Vision Zero City, Fernandina Beach will need to form a coalition focused on safety and injury prevention. Once the coalition is in place the City will adopt a Vision Zero resolution and add a Vision Zero element into its Comprehensive Plan. Then, the coalition will need to begin the process of collecting baseline data including the location of crashes, their severity, and if any patterns or common themes arise in why they occur. At this point the coalition needs to reach out to the public to solicit feedback on why people feel unsafe walking or riding their bikes around town. The coalition should inquire with school children, parents, cyclists, the High School Foundation, and any other resident that has safety concerns. This process will give the coalition data on the trouble spots and major issues that are causing traffic accidents in the City and begin the process of identifying solutions.

<https://visionzeronetwork.org/about/what-is-vision-zero/>

The Florida Department of Transportation has adopted Vision Zero into its Strategic Highway Safety Plan

[https://fdotwww.blob.core.windows.net/sitefinity/docs/default-source/safety/shsp-2021/shsp\\_mar21.pdf?sfvrsn=5452dad\\_0](https://fdotwww.blob.core.windows.net/sitefinity/docs/default-source/safety/shsp-2021/shsp_mar21.pdf?sfvrsn=5452dad_0)

### Vision Zero Action Plan - Orlando

In December 2017, Mayor Buddy Dyer signed a resolution to adopt a Vision Zero Action Plan. The Vision Zero Orlando Action Plan outlines strategies to reduce crashes. It also describes ways to share the progress of the program's goals with the community.

<https://www.orlando.gov/files/sharedassets/public/initiatives/vision-zero/vision-zero-action-plan-orlando-2021.pdf>

### Vision Zero Toolkit - Boston

The City of Boston, Massachusetts is a good case study for Vision Zero implementation. Their program has also developed a Vision Zero safety toolkit that can be used to retrofit existing infrastructure or be used in new streetscape designs to lessen the likelihood of traffic deaths and injuries. Strategies include

- clear corners;
- crossing islands;
- curb bump-outs;
- hardened centerlines;
- in-street "Yield to Pedestrians" signs;
- pedestrian warning signs;
- high-visibility crosswalks;
- raised crosswalks;
- raised intersections;
- pedestrian crossing flashing-lights;
- road right-sizing;
- protected bike lanes;
- slow turn wedges;
- stop signs; and
- T-intersections.

<https://www.boston.gov/departments/transportation/street-safety-toolkit>

### Safe Routes to School Initiative

The Safe Routes to School program is a concept is to increase the number of children from grade school to high school who walk or bicycle to school by funding projects that remove the barriers currently preventing them from doing so. Florida's Safe Routes to School (SRTS) program helps cities throughout the state address their school transportation needs and encourage more students to walk or cycle to school. Fernandina Beach would be a prime candidate City to initiate a program since a large amount of residential development is within walking distance of the schools. Guidelines, tool kits, and additional resources are found on the Safe Routes to School website.

<http://floridasrts.com/>

### AARP Walk Audit Guide

There are several case studies and toolkits available to help communities looking to do a walk audit. The AARP Walk Audit Tool Kit provides a step-by-step guide for conducting these types of studies. Scott County, Iowa developed their own tool kit based off AARP. Both tool kits are free and open to the public to use as a resource to conduct your own community walk audit.

<https://www.aarp.org/livable-communities/getting-around/info-2014/aarp-walk-audit-tool-kit.html>

### Bike Friendly Community Standards

Amelia Island is currently a Bronze Level Certified Bike Friendly Community. The League of American Bicyclists' website has a detailed graph identifying the requirements for each level.

<http://bikeleague.org/sites/default/files/BFC%20infographic.pdf>

## B. Improve Accessibility for Seniors & Disabled Residents

### Disabled Citizen Working Group - Athens, OH

One of the easiest and most effective ways to identify mobility issues for disabled residents and develop solutions is to reach out to the disabled community and listen to their experiences navigating the City. The City of Athens, Ohio, a small city of 25,000, established a Disabilities Commission to provide a means for the concerns of people with disabilities to be heard, to advocate for public policy change, and to provide expertise to the community on disabilities. The commission is comprised of 11 members appointed by the mayor and confirmed by the City Commission. The Commission's duties are to:

- Make recommendations to the Athens city government on city services related to the needs of persons with disabilities;
- Act as liaison between members of the community and local government;
- Respond to questions from the public, local government, and community;
- Consult with Athens city officials, council, and citizens;
- Inform the city of grant opportunities; and
- Submit activity reports and recommendations to the Athens City Council.

## Universal Design

Universal Design is “the design and composition of an environment so that it can be accessed, understood, and used to the greatest extent possible by all people regardless of their age, size, ability, or disability.” This approach is based off 7 primary principles.

1. **Equitable Use:** the design is useful and marketable to people with diverse abilities.
2. **Flexibility in Use:** The design accommodates a wide range of individual preferences and abilities.
3. **Simple & Intuitive Use:** Use of the design is easy to understand, regardless of the user's experience, knowledge, language skills or current concentration level.
4. **Perception Information:** The design communicates necessary information effectively to the user, regardless of ambient conditions or the user's sensory abilities.
5. **Tolerance for Error:** The design minimizes hazards and the adverse consequences of accidental or unintended actions.
6. **Low Physical Effort:** The design can be used efficiently and comfortably and with a minimum of fatigue.
7. **Size and Space for Approach and Use:** Appropriate size and space is provided for approach, reach, manipulation, and use regardless of user's body size, posture, or mobility.

Using Universal Design principles creates a more equitable experience for all users of public facilities and recreation amenities.

<https://universaldesign.ie/what-is-universal-design/>

## C. Establish Transit Options around the Island

### Trolley Tracker App - West Palm Beach, FL

West Palm Beach operates several free trolley lines in its downtown districts. These trolleys are operated by the West Palm Beach Downtown Development Authority (DDA) and funded through a special taxing district. The trolleys are advertised by the DDA throughout the downtown area and a trolley tracking app was developed for users. These are elements that the Island Hopper lacked as over 35% of public survey respondents did not know the service was available or how to use it, and 17% found the system inconvenient.

<https://downtownwpb.com/things-to-do/trolley-tracker-app/>

### FreeBee Microtransit Service

The City of Delray Beach has been offering a free, door to door, on demand transportation service in its downtown and adjacent neighborhoods. The service is run by the Delray Beach Community Redevelopment Agency (CRA) and is funded through tax increment revenues. The program operates low-speed, battery operated electric vehicles that can be requested via an app. It is run by FreeBee, a South Florida electric transportation company. The City began offering the service as an alternative to its trolley circulator that was seeing low ridership numbers. The trolley is being discontinued and City is focusing on enhancing its transportation services through microtransit programs like the FreeBee.

<https://www.delraybeachfl.gov/government/city-departments/public-works/transportation-traffic/downtown-shuttle-service>

ITEM TYPE: Final Subdivision Plat

**SYNOPSIS:**

Katie Newton, Legal Assistant
